Seeds

• • FOR MARKET GARDENERS

F. H. WOODRUFF & SONS, INC.

MILFORD, CONN.

Please Read Before Ordering

► Owing to the recognized fact that success in gardening depends not only upon the seed used but upon the skill of the gardener, weather, climate, soil, fertilizer, drainage, etc., orders will be accepted only with the distinct understanding that

F. H. WOODRUFF & SONS, INC., GIVES NO WARRANTY, express or implied, as to the productiveness of any seeds or bulbs it sells, and will not be in any way responsible for the crop. The seller's liability, in all instances, is limited to the purchase price of the seeds.

ORDER EARLY. Our rush comes in February, March and April.

USE THE ORDER SHEET, as you will help us by so doing. If you write us a letter, write it on a separate paper, not on the order sheet. If your express or freight office is different from your post office, give both. Please print your name and address.

TERMS are net cash with order. Remit by money order or check. Cash may be sent at your risk.

ABOUT POSTAGE. We pay postage on small lots of seeds only. We will prepay freight (but not express or postage) on all orders amounting to \$20 or more when remittance accompanies the order. Otherwise, all seeds, etc., are F.O.B. Milford, Conn.

PRICES in this catalog are subject to change without notice.

SHORTAGES Some kinds of seeds are short each year, and without doubt we will be sold out of some varieties before the season is over. For this reason we recommend that you permit us to substitute a variety of equal merit for any variety you may order which we are unable to supply.

ASPARAGUS

MARY WASHINGTON

This is the best of several rust resistant strains originated by the U. S. Department of Agriculture. The shoots are larger and grow more rapidly than the other kinds. The stalks are very thick, of an attractive green color with purple tops and grow unusually tall without breaking. Even the largest and thickest shoots of this variety are tender and delicious.

SEED: Pkt. 15c; oz. 25c; ¼ lb. 70c; lb. \$2.00

ROOTS: Per 100 roots \$2.50; per 1000 roots \$20.00

BRUSSELS SPROUTS

LONG ISLAND IMPROVED

92-97 days

This strain is the most uniform stock of this popular variety we have ever seen. The plants are 15 to 20 inches tall; the stems are literally covered with large firm sprouts. We can recommend this stock highly for the commercial grower. Pkt. 50c; oz. \$1.65; ¼ lb. \$4.80; lb. \$16.00.

Long Island Improved

BEANS

Dwarf Green Podded

ASGROW STRINGLESS VALENTINE 52 days

(Stringless Black Valentine)

ALL-AMERICA SELECTION Silver Medal 1933

Retains all the good qualities of the old Black Valentine but is stringless. Early. Plant is very hardy, upstanding, dark green and very prolific. Pods 5 to 6 inches long, oval, nearly straight, meaty, stringless, fine quality and delicate flavor. 15 lbs. \$6.50; 60 lbs. \$21.00.

PLENTIFUL

50-54 days

A new variety similar to Bountiful but superior in several ways. Pods are longer, slightly thicker, darker green, more tender and notably better in flavor. 15 lbs. \$6.00; 60 lbs. \$20.50.

BOUNTIFUL

46-49 days

A most popular variety for many markets. Very popular with the shipper because it is a prolific producer of flat and absolutely stringless pods of exceedingly fine quality. Pods are from 6½ to 7 inches long. 15 lbs. \$6.50; 60 lbs. \$21.00.

ASK FOR PRICES OF ANY VARIETIES NOT LISTED

BEANS — Continued

LOGAN

51 days

A new variety, bearing round, straight pods $5\frac{1}{2}$ to 6 inches in length, stringless and fiberless. Has shown ability to set pods under heat and drought conditions. Excellent for shipping. Resistant to powdery mildew and mosaic; tolerant of bacterial blight. 15 lbs. \$7.00; 60 lbs. \$24.00.

TENDERLONG

56 days

ALL-AMERICA SELECTION Honorable Mention 1946

Similar to Tendergreen, but with pods $6\frac{1}{2}$ to 7 inches long, which are round, fleshy, with very light fiber and only on occasional slight string. 15 lbs. \$7.00; 60 lbs. \$22.50.

STREAMLINER

48–52 days

A white-seeded bean of the Bountiful type, suitable for market or home gardens. The pods are flat, 7 to 9 inches long, stringless and fiberless. 15 lbs. \$7.50; 60 lbs. \$25.00.

DWARF HORTICULTURAL

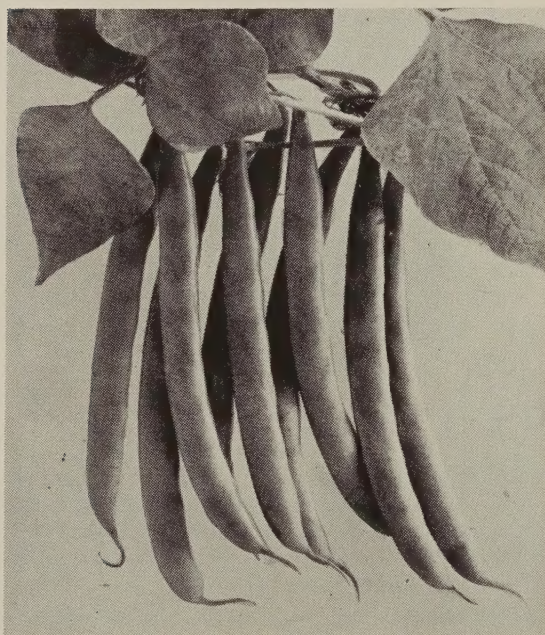

52–55 days

Used for snap or green shell beans. Similar to French Horticultural, but earlier, stringless and shorter podded. The pods are 5 inches long, green at first but changing to greenish yellow splashed with red, semi-round. 15 lbs. \$8.00; 60 lbs. \$26.00.

FRENCH HORTICULTURAL

65–70 days

A superior strain of shell bean with $5\frac{1}{2}$ to 7 inch pods, stringy, heavily splashed with red. Though a bush bean, it is inclined to have short runners. Our strain is unexcelled. 15 lbs. \$8.00; 60 lbs. \$26.00.

Plentiful

TENDERGREEN

53 days

This variety is becoming more popular each year, due to its productiveness and excellent shipping qualities. It is also largely used by canners. Pods $5\frac{1}{2}$ to 6 inches in length, are attractive in appearance, nearly straight, round, fleshy, dark green, absolutely stringless, and of excellent quality. 15 lbs. \$7.00; 60 lbs. \$23.00.

LOW'S CHAMPION

55 days

Also known as Red Cranberry, for shell or snap use, especially popular in New England. The pods are light green about 5 inches long, flat and stringless. 15 lbs. \$7.50; 60 lbs. \$25.00.

Dwarf Wax Podded

SURE CROP WAX

52–55 days

Also called Bountiful Wax. The pods are from 5 to 6 inches long, oval shaped, of a golden yellow color. Stringless and splendid quality. 15 lbs. \$7.00; 60 lbs. \$24.00.

IMPROVED KIDNEY WAX

52–55 days

An excellent mid-season variety, suitable especially for home and market garden use. Pods are 6 to $6\frac{1}{2}$ inches long, oval, stringless, and of fine quality. 15 lbs. \$7.00; 60 lbs. \$24.00.

ROUND POD KIDNEY WAX

52 days

An outstanding variety for market or canning. The pods are round, curved, stringless, 6 to $6\frac{1}{2}$ inches long, very brittle. 15 lbs. \$7.00; 60 lbs. \$24.00.

PENCIL POD BLACK WAX

54 days

One of the most popular of the wax-podded beans for home and market garden use. The pods are round, slightly curved, without a trace of string, and of highest quality. 15 lbs. \$7.00; 60 lbs. \$24.00.

CHEROKEE

52 days

An excellent new variety for use wherever an oval-flat podded wax bean is desired. The pods are about $6\frac{1}{2}$ inches long, fiberless and stringless. 15 lbs. \$7.00; 60 lbs. \$24.00.

TOPNOTCH GOLDEN WAX

50 days

A new and improved Golden Wax with longer pods, flat and stringless. This variety is highly disease-resistant. 15 lbs. \$6.50; 60 lbs. \$22.00.

Sure Crop Wax

POLE BEANS

Culture. Pole Beans are more tender than bush beans and should be planted later. Poles eight to nine feet long should be set firmly in the ground 4 x 3 ft. apart. Plant 5 to 8 beans around each pole; later thinning to four vines. Cover the seed inch deep. One pound of seed will plant 75 to 100 hills; 30 lbs. per acre.

KENTUCKY WONDER

65 days

This variety is one of the earliest and most desirable of all the green podded running types. Pods borne in clusters are round, 7½ to 8½ inches long, curved, slightly stringy, but of a delicious flavor. They cook tender at all times. 15 lbs. \$7.00; 60 lbs. \$24.00.

LONDON HORTICULTURAL

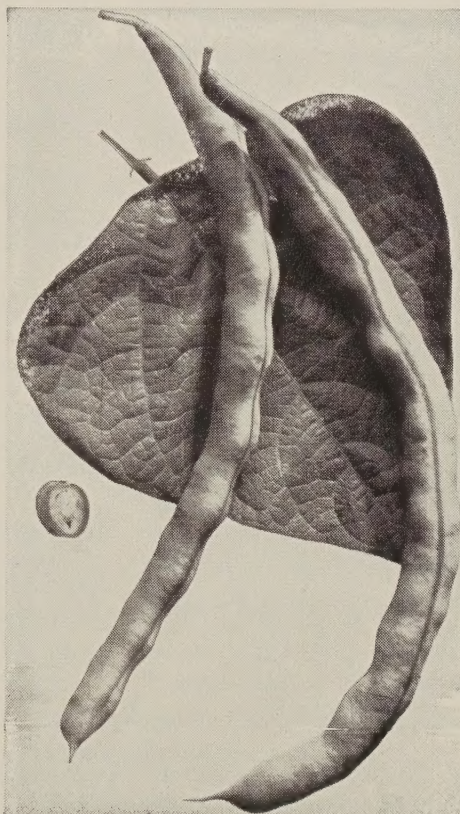

69-73 days

A "Cranberry Bean" for use as a snap and green shell bean. This is a prolific variety with light green, flat, 6 to 6½ inch pods. 15 lbs. \$7.00; 60 lbs. \$24.00.

KING HORTICULTURAL

80-85 days

A pole cranberry bean of some popularity in New England especially. Pods 5½-6½ inches, thick oval, stringy and fibrous. For shell bean use. Largest pods and seeds of the pole horticultural beans. 15 lbs. \$8.00; 60 lbs. \$26.00.

Kentucky Wonder

POLE LIMA BEANS

Culture. One pound is enough for 50 poles; 30 lbs. per acre. Poles should be set about 4 feet apart each way. When the ground is warm plant 4 to 6 beans to a pole, eyes down and 2 inches deep. When well started thin to 2 vines to a pole and cultivate often.

KING OF THE GARDEN

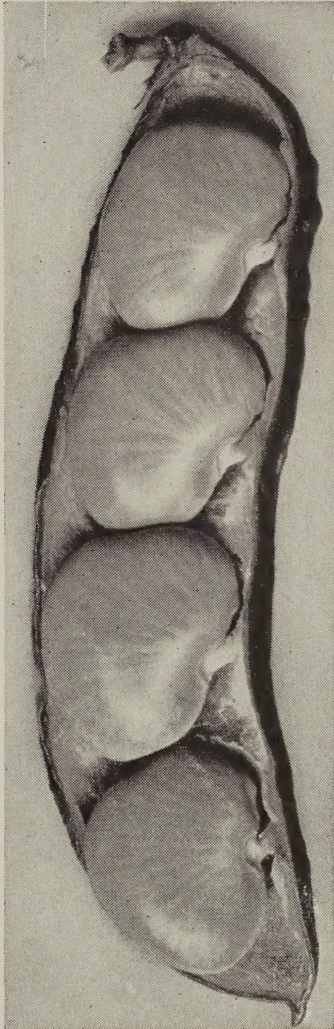

87-93 days

An improved strain of Large White Pole Lima. The pods are from 5 to 6 inches long and contain 4 or 5 large, flat beans of good quality. 15 lbs. \$7.00; 60 lbs. \$24.00.

FIELD OR BAKING BEANS

	15 lbs.	60 lbs
BOSTON PEA OR NAVY. Most popular for baking. The seed is small, almost round and white.	\$5.00	\$16.00
LARGE WHITE MARROW. A large seeded baking bean with oval, white seed.....	6.00	20.00
IMPROVED YELLOW EYE. The favorite New England baking bean, with fat, oval seeds, white with deep yellow eye.....	6.00	20.00
WHITE KIDNEY. The seed is long, white and kidney-shaped.....	5.50	18.00
RED KIDNEY (Mahogany). Seed is large, kidney-shaped and dark reddish-brown.....	5.50	18.00
LIGHT RED KIDNEY, CALAPPROVED (Certified). For those who want heavy yields and best quality.....	5.50	18.00
DARK RED KIDNEY, CALAPPROVED (Certified). Same as above except darker red.....	5.50	18.00

BUSH LIMA BEANS

Fordhook 242 Bush Lima

FORDHOOK BUSH

76 days

The most popular of the large Dwarf Limas for home or market, producing a very heavy crop with large, fat pods in clusters of 5 to 8. Each cluster contains 3 to 5 meaty beans which retain their green tint when dried. 15 lbs. \$7.50; 60 lbs. \$24.50.

FORDHOOK 242

75 days

 **ALL-AMERICA SELECTION** Bronze Medal 1945

Promising new Fordhook-type lima, with thick seeds, 3 or 4 to the pod, of finest flavor. The pods are very uniform, and hold their size on the late sets. The early and total yields are heavy, and hot weather does not seem to affect its yield. 15 lbs. \$7.50; 60 lbs. \$24.50.

BURPEE'S IMPROVED BUSH

76 days

Similar to Burpee's Bush but slightly earlier. The pods grow 4½ to 5½ inches long and are filled with large, plump beans more oval than flat. The plants make a vigorous, upright growth with heavy foliage. 15 lbs. \$7.00; 60 lbs. \$24.00.

EARLY MARKET

73 days

 **ALL-AMERICA SELECTION** Bronze Medal 1945

A new bush lima of the flat-seeded Burpee's Bush type, heavier yielding and considerably earlier. The green seed-coats make the beans look fresh even when fairly old. The pods are dark green, mostly with 3 seeds, and averaging over 4½-5½ inches long. 15 lbs. \$7.00; 60 lbs. \$24.00.

PEERLESS

72-80 days

Developed by the U. S. Department of Agriculture, Peerless has a plant of the Henderson type, but the pods are longer, broader and thicker, usually with two or three beans but occasionally four per pod. The seeds are about two-thirds the size of Fordhook and are thick. This variety requires more space in the field than Henderson, and yields as well or better. The beans retain their green color when canned or frozen. 15 lbs. \$7.00; 60 lbs. \$24.00.

TRIUMPH

70-78 days

Developed as U.S.D.A. 343, Triumph is a Henderson type, but has thicker and better quality seeds which are green in the edible stage. High yield. Pods 2½-3 inches long and very thick. 15 lbs. \$7.50; 60 lbs. \$24.50.

WOODRUFF'S CANGREEN

65-70 days

 **ALL-AMERICA SELECTION** Honorable Mention 1943

In all other respects resembling the Henderson Bush Lima, CANGREEN is notable for the green color of the fleshy part of the seed (cotyledons) in the dry stage. This makes it attractive for canning, either by the canner or in the home. It is also very prolific, yielding a large crop of pods and seed. 15 lbs. \$7.00; 60 lbs. \$24.00.

HENDERSON'S BUSH

67 days

The earliest small Bush Lima. Sometimes called "Baby Lima" and in the South "Butter Bean". The plants are medium size, dark green, bearing pods 3 inches long containing 3 small, flat beans. When picked at the proper stage, the beans retain an attractive greenish tint and have a most delicious flavor. 15 lbs. \$6.50; 60 lbs. \$22.00.

BEET

Culture. A rich, sandy loam will give best results with table beets. Sow the seed in the early spring in rows 16 to 24 inches apart and when about 2 inches high, thin to 3 inches apart. For winter use, sow from July 1st to August 10th. One ounce of seed will sow 100 feet of row; 6 to 8 pounds per acre.

WOODRUFF'S EARLY WONDER 49-52 days

A splendid extra early variety equally good for the trucker or market gardener. The roots are semi-globe shaped with medium dark green tops, and small tap root. The skin is dark red, flesh deep blood-red with little zoning. Oz. 25c; ¼ lb. 55c; lb. \$1.50.

WINTER KEEPER (Lutz Greenleaf) 70 days

This globe shaped beet is named for its ability to keep in winter storage. The flesh is dark red, sweet, and uniformly excellent in flavor. Oz. 25c; ¼ lb. 55c; lb. \$1.50.

ASGROW WONDER 50-52 days

ALL-AMERICA SELECTION Gold Medal 1934

Extra early. The roots are the deepest red all through, semi-flat with rounded bottom, large and smooth skinned, 12-14 inch tops for good bunching. Oz. 25c; ¼ lb. 55c; lb. \$1.50.

EARLY RED CHIEF 50-52 days

A new early beet of unusual merit, fast growing with dark red flesh. The shape is attractive, perfectly round instead of flattened as are most early sorts. The roots are smooth of uniform shape with small tap root. The tops are medium, not too small for bunching. Oz. 25c; ¼ lb. 55c; lb. \$1.50.

DETROIT SHORT TOP 57-60 days

An outstanding stock for main crop with an exceptionally dark interior color. The beet is a deep globe shape, smooth and has a small tap root. The top is small to medium. Oz. 25c; ¼ lb. 55c; lb. \$1.50.

DETROIT DARK RED 55-58 days

A standard late variety with globe shaped roots. The flesh is dark red with indistinct zones and of unsurpassed quality, the tops large. Oz. 25c; ¼ lb. 55c; lb. \$1.50.

CROSBY'S EGYPTIAN 50-52 days

An improved strain of the popular Crosby's Egyptian with more uniform shape, a large top and fine dark interior color. A fine beet for bunching. Oz. 25c; ¼ lb. 55c; lb. \$1.50.

Detroit Dark Red

EXTRA EARLY FLAT EGYPTIAN 49-51 days

The earliest beet in cultivation, very dark inside color, small tops and flattened roots. Oz. 25c; ¼ lb. 55c; lb. \$1.50.

SWISS CHARD

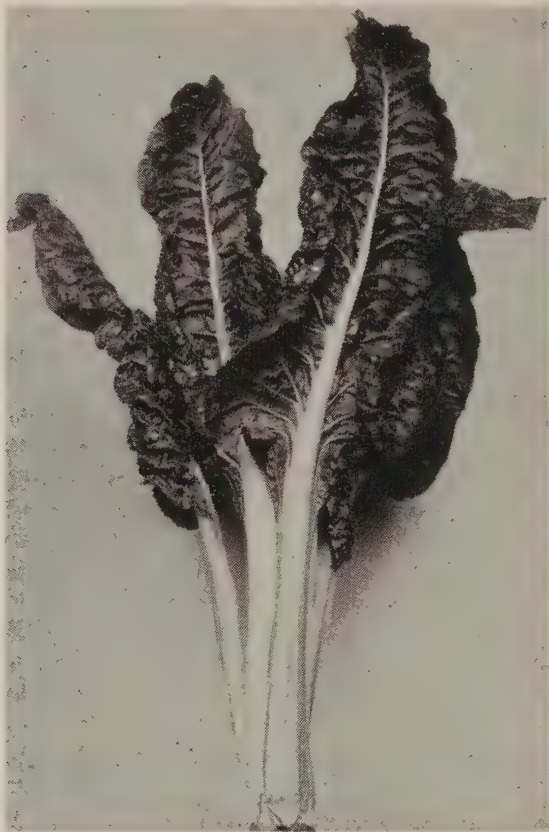

LUCULLUS 50-55 days

The most popular Swiss Chard. This is a very large variety with light green crumpled leaves. The plants grow nearly two feet high, the leaves are very large and of fine quality. Oz. 20c; ¼ lb. 50c; lb. \$1.25.

FORDHOOK GIANT 55-60 days

The leaves are dark green, heavily crumpled; stems broad, thick and pure white. This variety combines the good features of Lucullus and Broad Rib Green. Oz. 20c; ¼ lb. 50c; lb. \$1.25.

SWISS CHARD — *Continued*

Lucullus Swiss Chard

BROAD RIB GREEN 53–58 days
The leaf is smooth and a very dark glossy green. The rib is extra broad and white, which makes it an attractive variety for market gardeners. It is sometimes called White Silver. Oz. 20c; ¼ lb. 50c; lb. \$1.25.

MANGEL-WURZEL BEET

Culture. Same as for table beets, except that the rows should be 24 to 36 inches apart, and thin to 6 inches apart in the row.

MAMMOTH LONG RED 110 days
An improved strain of the Long Red which grows very large and well out of the ground. It has long, straight roots of a medium red color; does best on light soils. It is the mangel most used for stock feeding. ¼ lb. 40c; lb. \$1.00.

GOLDEN TANKARD 100 days
A good yielder, roots long and oval shaped, large. The flesh is orange yellow, tops small and yellow green. ¼ lb. 40c; lb. \$1.00

GIANT HALF SUGAR ROSE 90 days
Roots are broad, wedge-shaped, rose color above ground and white below ground. White flesh. ¼ lb. 40c; lb. \$1.00.

GIANT HALF SUGAR GREEN TOP 90 days

Similar to Giant Half Sugar Rose, except that the root is greenish above ground. ¼ lb. 40c; lb. \$1.00.

CABBAGE

Standard Varieties

ELITE GOLDEN ACRE 60–63 days
An improved new variety of the Golden Acre type which will mature practically all of its crop under normal conditions about 60 days after transplanting. It is shaped like a ball and the leaves have an attractive green color. The stem is very short. ½ oz. 55c; oz. 90c; ¼ lb. \$3.00; lb. \$10.00.

GREEN ACRE 68–70 days
Similar to Golder Acre as to plant and head type, but with darker green exterior and greenish white interior. It holds its color well for shipping. ½ oz. 55c; oz. 90c; ¼ lb. \$3.00; lb. \$10.00

RED ACRE 75–78 days
The earliest red cabbage, of Golden Acre type, but is more leafy and has medium red heads. ½ oz. 55c; oz. 90c; ¼ lb. \$3.00; lb. \$10.00.

GOLDEN ACRE 63–66 days
The heads are of fine quality, round as a ball, medium size (2½–3 lbs.) and very firm. The plants are of neat compact growth so that they may be set close together. The most profitable early market variety and also popular with the home gardeners. ½ oz. 40c; oz. 55c; ¼ lb. \$1.65; lb. 5.50.

COPENHAGEN MARKET 65–70 days
A short-stem, medium sized variety, with heads 6–7 inches in diameter and weighing 3 to 3½ lbs. The heads are tight, fine grained, tender and not inclined to premature bursting. Standard early round head variety. ½ oz. 35c; oz. 50c; ¼ lb. \$1.50; lb. \$5.00.

DANISH BALLHEAD 105–110 days
A distinct type of Danish origin. The round solid heads average 6 to 7 pounds, and keep exceptionally well. Makes very good kraut. Short stem strain. ½ oz. 35c; oz. 50c; ¼ lb. \$1.50; lb. \$5.00.

PENN STATE BALLHEAD 103–107 days
 **SELECTION** Silver Medal 1934

An improved strain of Ballhead with medium sized plants and a short stem. The heads are flattened globe and are very desirable for kraut. ½ oz. 40c; oz. 55c; ¼ lb. \$1.80; lb. \$6.00.

DANISH ROUNDHEAD 105-110 days

A very fancy short stemmed variety of the Ballhead type. It forms hard, compact, round heads which are fine for shipping, storage or kraut. ½ oz. 35c; oz. 50c; ¼ lb. \$1.50; lb. \$5.00.

SPECIAL RED ROCK 100-105 days

We believe this unsurpassed red cabbage should be included among the yellows-resistant varieties from observations made on infested soil the past few years. This superior strain is, we think, the acme of perfection. ½ oz. 60c; oz. \$1.00; ¼ lb. \$3.60; lb. \$12.00.

RED HOLLANDER 95-100 days

Resistant to "yellows." A red cabbage of the Ballhead or Hollander type, and good for storage or shipping. ½ oz. 50c; oz. 70c; ¼ lb. \$2.50; lb. \$8.00.

SPECIAL LONG ISLAND SAVOY 95-100 days

The heads are large and solid and heavily savoyed. This extra fine strain of Savoy cabbage is grown by us for the critical Long Island trade. ½ oz. 55c; oz. 90c; ¼ lb. \$3.00; lb. \$10.00.

Golden Acre

Yellows-Resistant Varieties

DETROIT

(Resistant Golden Acre) 63-66 days

This is a very uniform stock for size, shape, and is only a day or so later than Elite Golden Acre. It can be used with absolute satisfaction wherever early cabbage of the Golden Acre type is wanted. In addition it will produce good crops on "yellows" sick soil where regular Golden Acre cannot do well. ½ oz. 50c; oz. 70c; ¼ lb. \$2.50; lb. \$8.00.

JERSEY QUEEN 65-68 days

A yellows-resistant selection from Jersey Wakefield, which it resembles in type, but with more solid heads and finer texture. ½ oz. 35c; oz. 50c; ¼ lb. \$1.50; lb. \$5.00.

ALL HEAD EARLY	35c	50c	\$1.35	\$4.50
ALL SEASONS	35c	50c	1.35	4.50
CHARLESTON WAKEFIELD	35c	50c	1.35	4.50

JERSEY WAKEFIELD	35c	50c	1.35	4.50
PREMIUM LATE FLAT DUTCH	35c	50c	1.35	4.50

GLOBE 78-85 days

This is the resistant strain of Glory of Enkhuizen, with large, spreading plants. The heads are large, globe, 8 to 9 inches in diameter, hard and attractive. ½ oz. 35c; oz. 50c; ¼ lb. \$1.50; lb. \$5.00

MARION MARKET 75-78 days

The heads are very uniform of the true Copenhagen type making good, early, round heads on land so diseased with yellows that other cabbage fails entirely. Only a few days later than Copenhagen Market. ½ oz. 40c; oz. 55c; ¼ lb. \$1.80; lb. \$6.00.

WISCONSIN ALL SEASONS 92-95 days

A mid-season variety for general purpose use similar to the ordinary All Seasons. A very uniform stock producing large crops and very highly resistant. ½ oz. 35c; oz. 55c; ¼ lb. \$1.65; lb. \$5.50.

WISCONSIN BALLHEAD 95-100 days

Similar in type to Danish Ballhead and Wisconsin Hollander No. 8, but with slightly smaller, harder heads and more uniform. Highly resistant to yellows. ½ oz. 40c; oz. 55c; ¼ lb. \$1.80; lb. \$6.00.

WISCONSIN HOLLANDER No 8 108-112 days

A resistant strain of Ballhead to which it is very similar. The heads are uniform, round, and very deep green with a purple or bluish tint on the edges. The plants are of strong, healthy growth with short stems. ½ oz. 35c; oz. 50c; ¼ lb. \$1.50; lb. \$5.00.

BUGNER 105-110 days

This is a late cabbage of the Danish type and is popular in many sections. It will produce large crops on "yellows" sick land. The heads are large, some slightly flattened, very solid and heavy. Keeps well in storage. ½ oz. 60c; oz. \$1.00; ¼ lb. \$3.60; lb. \$12.00.

CHINESE CABBAGE

Culture. Sow in midsummer for fall crop, as it will not head in hot weather. Two pounds of seed per acre; ¼ oz. for 100 feet of row. Rows thirty inches apart; plants 12 to 16 inches apart.

CHIH LI OR IMPROVED PEKIN 70-75 days

By far the best variety, heads earlier and more evenly than any other kind. The heads are pointed, very firm and when matured are often 18 inches long. They are pure white inside, tender and of finest quality. Oz. 25c; ¼ lb. 70c; lb. \$2.00.

BROCCOLI

PROPAGENO EARLY

58-60 days

Our superior strain of early broccoli, for years the favorite of expert broccoli growers. Oz. 90c; ¼ lb. \$3.00; lb. \$10.00.

CALABRESE (Medium Early)

60-70 days

The standard variety in general use, excellent in every way and to be used where earliness is not an important factor. Oz. 90c; ¼ lb. \$3.00; lb. \$10.00.

DE CICCO

55-60 days

An improved strain especially useful for quick freezing, the center head being cut early to stimulate the growth of larger and more uniform side heads. About 2 feet tall, with a center head 3 inches in diameter. Oz. 90c; ¼ lb. \$3.00; lb. \$10.00.

Propageno Early Broccoli

CAULIFLOWER

Super Snowball

SUPER SNOWBALL

56-57 days

A grand variety, one of the earliest strains of Snowball and on this account has been one of the most profitable varieties of the grower. It heads so evenly that often the largest part of the crop can be harvested before the later varieties are ready. It requires good land and favorable growing conditions for best results. ½ oz. \$2.25; oz. \$3.50; ¼ lb. \$11.25; lb. \$38.00.

SNOWDRIFT

57-60 days

Sometimes called White Mountain, this variety is noted for its extremely white heads. The heads are large, deep and with a fine tight curd. The plants are sturdy with large leaves that cover the head exceptionally well. This is a very reliable variety and popular in many sections. ½ oz. \$2.25; oz. \$3.50; ¼ lb. \$11.50; lb. \$38.00.

EARLY SNOWBALL

54-55 days

A strain we have been selling for years. This is without doubt the best all around cauliflower and we highly recommend it for both the home garden and market. It will produce the finest, most attractive heads. ½ oz. \$2.00; oz. \$3.00; ¼ lb. \$10.50; lb. \$35.00.

CANTALOUPE or MUSKMELON

SCHOON'S HARD-SHELL

90-95 days

A new and excellent flavored melon. It is valuable especially for its extra hard shell, which makes it fine for shipping. It will stand in the field or market better than most varieties. It is deeply ribbed, well netted over its yellow skin. The melons usually weigh from 5 to 8 pounds. Oz. 45c; ¼ lb. \$1.20; lb. \$4.00.

SENECA BENDER

90-94 days

Our special strain of the popular Bender melon. The fruits are big and heavy, many weighting 10 pounds or more. The flesh is very thick, deep orange in color and very fine flavor. The skin is light green turning to a deep golden tint when ripe. Oz. 50c; ¼ lb. \$1.50; lb. \$5.00.

HALE'S BEST No. 36

82-86 days

The earliest and best melon of the Rocky Ford type. The fruit is of medium size, oval and very heavily netted. The flesh is of deep orange color, very firm, thick and of high flavor. This is one of the best melons for shipping and is popular at all northern markets. Oz. 25c; ¼ lb. 65c; lb. \$1.75.

DELICIOUS

83-87 days

This early melon is a great favorite wherever grown because of its earliness, heavy yield and fine appearance. The melons ripen two weeks earlier than Bender's Surprise and are medium large, averaging 5 pounds or more. The flesh is moderately firm, deep orange and always sweet. Oz. 35c; ¼ lb. \$1.00; lb. \$3.00.

PRIDE OF WISCONSIN

90-95 days

Also called Queen of Colorado, this is a good market melon of superior quality, pointed-oval in shape with faint ribbing and very coarse netting. It has very thick, solid orange flesh and is to be recommended. Oz. 45c; ¼ lb. \$1.20; lb. \$4.00.

SUGAR ROCK (Honey Rock)

82-87 days

This melon has become very popular in many sections, because of its earliness and superior quality. The melons are very attractive, medium in size, round, with a coarse heavy netting. The flesh is firm, thick, deep orange in color, very sweet and of delicious flavor. Oz. 25c; ¼ lb. 70c; lb. \$2.00.

HEARTS OF GOLD (Morrill's Large Strain)

93-97 days

An improved strain, larger and a better shipper than the old Hearts of Gold or Hoodoo. 6½-7 inches in diameter, weighing 4-5 pounds, excellent quality. Oz. 25c; ¼ lb. 70c; lb. \$2.00.

IMPERIAL No. 45

85-90 days

A type of Hale's Best adapted to mildew sections, but popular as a shipper in all sections, as it has all of the best features of Hale's Best. It has thick, sweet, salmon flesh, a very small seed cavity, is medium in size, has heavy netting and a faint rib. Oz. 25c; ¼ lb. 70c; lb. \$2.00.

HALE'S BEST-JUMBO

84-88 days

An excellent melon, popular in some of the best growing sections, which is similar to Hale's Best No. 36, but with fruits about an inch larger each way, and somewhat later. Oz. 25c; ¼ lb. 65c; lb. \$1.75.

Green Fleshed Varieties**ROCKY FORD**

87-92 days

The leading green-fleshed melon with a so-called gold lining. The fruit is rather small, almost round, and the thick flesh is of fine grain and delicious flavor. It is a widely cultivated local market and shipper type. Oz. 25c; ¼ lb. 65c; lb. \$1.85.

HONEY DEW

112-115 days

This well-known melon is of the Casaba type, oval in shape, of good size, with a smooth lemon-tinted skin, and keeps well. The thick, green-tinted cream flesh has a delicious sweetness all its own. Oz. 25c; ¼ lb. 70c; lb. \$2.00.

HONEY BALL

103-108 days

An excellent home, local market and shipping melon, being selected from a cross of Honey Dew and Texas Cannon Ball. The flesh is pale silvery green, very juicy, sweet flavored. Oz. 25c; ¼ lb. 70c; lb. \$2.00.

CARROT

Nantes (Strong Top) Carrot

MORSE'S BUNCHING

77 days

ALL-AMERICA SELECTION Gold Medal 1934

This is a particularly fine bunching carrot. The roots grow about 8 inches long, are smooth, slightly stump-rooted and of excellent quality, sweet and fine grained. They are deep orange in color and with practically no core. It is an excellent kind for the home garden as well as for market. Oz. 25c; ¼ lb. 70c; lb. \$2.00.

IMPERATOR

77 days

ALL-AMERICA SELECTION Silver Medal 1933

Similar in size and shape to Morse's Bunching, with medium tops strong enough for bunching, shoulders slightly rounded. Bright orange color and coreless. Oz. 25c; ¼ lb. 70c; lb. \$2.00.

DANVERS HALF LONG

75 days

The old standard Danvers carrot, tapers more than the old strain of Chantenay. It is 7 to 8 inches in length, but not coreless. Oz. 25c; ¼ lb. 65c; lb. \$1.75.

NANTES (Strong Top)

68 days

Because of its fine quality, this undoubtedly is the best carrot for the home garden and is also popular as a topped carrot for market. Deep orange color throughout, coreless, cylindrical in shape and strongly stump ended. The top is strong and suitable for bunching. Oz. 30c; ¼ lb. 80c; lb. \$2.50

GREATER CHANTENAY

72 days

This is a recent development from the old Chantenay and is one to two inches longer, in line with popular demand of recent years for longer carrots. It is smooth with strong top, and resembles Chantenay in other respects. Oz. 25c; lb. 65c; lb. \$1.75.

IMPROVED LONG ORANGE

85-88 days

For those who prefer a long carrot, this is a desirable sort. The skin is dark orange, the flesh yellow, with a distinct core yet of fine quality. It is late in maturing. Oz. 25c; ¼ lb. 70c; lb. \$2.00.

DANVERS LONG STRAIN

75 days

A longer, slimmer, and finer quality Danvers, smoother and absolutely coreless. Deep orange in color with a good bunching top. We recommend it highly for market or home use as it compares most favorably with the fancy grade carrots usually shipped from California, both in shape and color. Oz. 25c; ¼ lb. 65c; lb. \$1.75.

TOUCHON

70 days

An improved strain of Nantes, similar to it in most respects, but with slightly longer root and stronger top. Oz. 30c; ¼ lb. 80c; lb. \$2.50.

RED CORED CHANTENAY

70 days

This is an improved type of Chantenay. The roots are tapered, less stump-rooted, and slightly longer than the old Chantenay averaging about 6 inches long. The interior is solid orange colored without the usual lemon color in the core. Oz. 25c; ¼ lb. 65c; lb. \$1.75.

LONG JOINTED WONDERFUL (Non-Bolting)

115-120 days

A selection from the original Wonderful, this newer strain has a longer first joint and is recommended where the original strain does not produce satisfactory height of stalk. It is also free from soft stalks, is heavy and compact and ships well. ½ oz. \$1.50; oz. \$2.00; ¼ lb. \$6.00; lb. \$20.00.

CORNELL 19

110 days

A new main crop variety developed at Cornell University, for both muck and upland cultivation. Its pedigree involves a cross between Pascal and late Golden Self-Blanching. While the heart is not as large as in some varieties, the very excellent quality extends even to the outside stalks, which reduces stripping to a minimum. It is highly resistant to fusarium wilt or yellows, has thick, fleshy leafy stalks, smooth ribbing, and less stringiness than most self-blanching varieties. It keeps well in storage and has proven very satisfactory in the celery growing sections of New York and elsewhere. This strain has the longest stalks of the Cornell types. ½ oz. \$1.50; oz. \$2.00; ¼ lb. \$6.00; lb. \$20.00.

UTAH or GOLDEN CRISP

125-130 days

Very popular for fall planting, matures 20-30 days earlier than Giant Pascal; medium tall, sturdy and compact; not adapted to long shipping because of tenderness; thick, broad, well rounded stems, very crisp and flavorful. ½ oz. 60c; oz. \$1.00; ¼ lb. \$3.60; lb. \$12.00.

	½ oz.	oz.	¼ lb.	1 lb.

---------------------	-----	------	------	-------

CELERY

Yellow Varieties

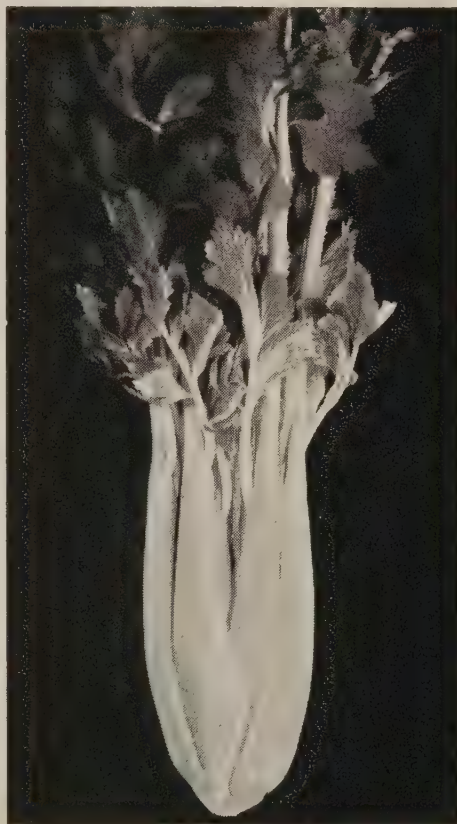

TALL GOLDEN (Self-Blanching) 105-110 days

An improved strain of the old Golden Self-Blanching. It is tall, very compact, medium diameter bunch, blanches readily to creamy white; stalks long, medium broad, medium thick, fair to good quality. ½ oz. 90c; oz. \$1.40; ¼ lb. \$4.20; lb. \$14.00.

WONDERFUL (Golden Plume) 112-117 days

This is the original strain which has proved so popular with our customers and is the most used of the yellow or self-blanching types. It is unusually thick set and compact, and attains exceptional weight. It is remarkably free from seeders and for this reason is especially good for late crop. The joint is from 9 to 10 inches long. If a longer first joint is wanted we suggest our Long Jointed Wonderful. ½ oz. \$1.50; oz. \$2.00; ¼ lb. \$6.00; lb. \$20.00.

Green Varieties

Long Joint Wonderful

Green Varieties

WOODRUFF'S BEAUTY

85-90 days

This exceptionally fine stock of green celery has been grown for us for many years by an expert who developed the strain himself. It is a dwarf, very compact and heavy variety resembling Golden Self-Blanching in appearance. The heart is large and stocky. We heartily recommend it to our customers. ½ oz. \$1.35; oz. \$1.75; ¼ lb. \$5.40; lb. \$18.00.

SECAUCUS GREEN

130-135 days

A new green celery used by many of the best growers in New Jersey, and suitable for medium early or late crop. It is a fine keeper and almost never shows any soft stalks and is more firm than Giant Pascal. It grows 16 to 18 inches tall, with first joint 7 to 8 inches long. ½ oz. \$1.50; oz. \$2.00; ¼ lb. \$6.00; lb. \$20.00.

SUMMER PASCAL

110-120 days

An early green celery of superior quality. The plant is not tall, but robust. The stems to the first joint are excep-

tionally long, 8 to 9 inches. It blanches to a pure white. Summer Pascal is an early variety maturing right after Easy Blanching and before Utah or Golden Crisp. ½ oz. \$1.50; oz. \$2.00; ¼ lb. \$6.00; lb. \$20.00.

SWEETHEART.....	\$1.25	1.75	5.40	18.00

CELERIAC

GIANT SMOOTH PRAGUE

110-120 days

The standard variety for home or market producing large tubers nearly globular in shape. ½ oz. 55c; oz. 90c; ¼ lb. \$3.00; lb. \$10.00.

HYBRID SWEET CORN

Yellow Hybrids

MIDGOLDEN

74 days

Developed by us to supply the need for an earlier Golden Cross Bantam. The ears are 10-12-14 rowed and much the same as Golden Cross, and the hybrid is less susceptible to smut and drought. 12½ lbs. \$6.50; 50 lbs. \$22.00.

GOLDEN SECURITY

82 days

A new Woodruff hybrid for late crop. The stalks are 7½ feet tall, the ears 14-16 rowed, 8-8½ inches long. Its yields have been superior to any yellow hybrids in our trials, and it has excellent quality. 12½ lbs. \$6.50; 50 lbs. \$22.00.

WOODRUFF'S EARLIGOLD

70 days

The earliest yellow hybrid developed by us for market gardeners who have been looking for a hybrid both early and large eared. The ears are 6½-7 inches, slight taper, uniform type, 12 rows, straight rowed, well filled tips, good coverage of heavy husks; husked ears average 6¾ ounces. Plants 5½-6 feet tall. 12½ lbs. \$6.50; 50 lbs. \$22.00.

MARCCROSS

71 days

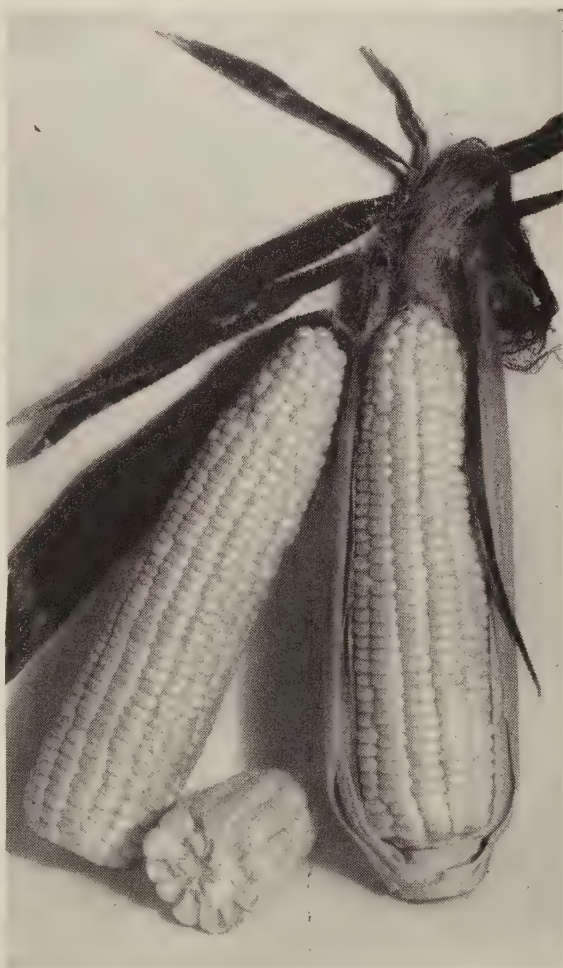

An early large eared, wilt resistant market hybrid. The ears are 6-7 inches long, slightly tapered, uniform 10-12 rows, straight rowed, fairly well filled tips, heavy husk coverage, husked ears average 9 ounces. Plants are 5-5½ feet. 12½ lbs. \$6.00; 50 lbs. \$20.00.

ILLINOIS GOLDEN No. 10

83 days

For a heavier yielding main crop strain. The ears are very uniform, 7-8 inches long, 12-14 rows, cylindrical

to slightly tapering, with medium heavy husks. The kernels are medium yellow, and medium in breadth and depth, of very fine quality. Stalks grow 6½-7½ feet tall. 12½ lbs. \$6.00; 50 lbs. \$20.00.

Woodruff's New Earligold

SPANCROSS

66-68 days

ALL-AMERICA SELECTION Honorable Mention 1941

An extra early yellow hybrid, with medium sized ears and short stalks. Resistant to wilt and somewhat resistant to cold, as it can be planted in late April in southern Connecticut. 12½ lbs. \$6.50; 50 lbs. \$22.00.

SENCROSS IMPROVED

76 days

This topcross produces 12-14 rowed slightly tapering to tapering ears 7-8 inches long, was developed by us for high yielding, second early canner's and market gardener's hybrid, has a uniform color and is resistant to bacterial wilt. 12½ lbs. \$6.00; 50 lbs. \$20.00.

VICTORY GOLDEN

84 days

A new Woodruff hybrid for main crop, taller than Golden Cross Bantam and drought resistant. Ears 8-8½ inches, 12-16 rows. Has excellent quality and is highly resistant to bacterial wilt. 12½ lbs. \$6.00; 50 lbs. \$20.00.

CARMELCROSS

74 days

This cross of Connecticut inbreds 13 and 30 was developed by the Connecticut Agricultural Experiment Station for a large eared, wilt resistant, early market hybrid. It is recommended for New England and the northeastern states. The ears have 12-14 rows of kernels and are slightly tapering in shape. 12½ lbs. \$6.00; 50 lbs. \$20.00.

GOLDEN CROSS BANTAM

82 days

Developed by Mr. G. M. Smith of Purdue University Agricultural Experiment Station for a midwestern canner's hybrid. At present it is the leading hybrid for all purposes. The ears are about 8 inches long, very uniform, and have 12 to 14 rows of kernels. The stalks average 6½ to 7 feet in height, are sturdy and straight and under favorable conditions two ears are usually produced on each stalk. It is also resistant to Stewart's disease or wilt. It has been greatly improved since it was introduced several years ago. 12½ lbs. \$6.00; 50 lbs. \$20.00.

LINCOLN

79 days

ALL-AMERICA SELECTION Bronze Medal 1941

A new midseason yellow hybrid developed by the Connecticut Agricultural Experiment Station for market. It is stiff-stalked, normally with one ear per stalk and very few suckers. Stalks are 6-6½ feet high. Ears are 12-16 rowed, 7½-8 inches long, cylindrical in shape, with broad kernels of medium depth. The hybrid is wilt-resistant, drought-tolerant and of good quality. 12½ lbs. \$6.50; 50 lbs. \$22.00.

LEE

80 days

A midseason yellow hybrid developed by the Connecticut Station. It resembles Lincoln hybrid in all respects except that it has slightly longer ears, red silks, and by some it is said to have better quality for eating. The ears are 7-8 inches long, slightly tapering. Grows 6½ feet tall. It is wilt-resistant and somewhat drought-tolerant. 12½ lbs. \$6.50; 50 lbs. \$22.00.

IOANA

82 days

ALL-AMERICA SELECTION Bronze Medal 1940

Developed at the Iowa Agricultural Experiment Station as a large eared, main crop, canner's hybrid. It shows more heat and drought tolerance than Golden Cross Bantam. The ears are 8-8½ inches long, very uniform, cylindrical with rounded tip, 12-14 rowed. The kernels are light yellow, and of fine quality and flavor. 12½ lbs. \$6.00; 50 lbs. \$20.00.

GOLDEN EVERGREEN HYBRID

83-85 days

A late yellow hybrid developed by us to replace Bantam Evergreen. The ears have 12-16 rows, taper slightly, with medium to dark yellow kernels. The stalks grow 7-8 feet tall. More wind-resistant and better yielding than Bantam Evergreen. 12½ lbs. \$6.00; 50 lbs. \$20.00.

WHIPCROSS

79 days

A combination of Purdue 39 and Conn. 2 first made by us for a larger eared Whipple hybrid in Whipple season. The ears are 7-8 inches long, slightly tapered with square tip end, very well filled tips, 14-16 rows, straight rowed, heavy coarse husk. The husked ears average 7 ounces in weight. 12½ lbs. \$6.00; 50 lbs. \$20.00.

White Hybrids**WHITE KERNEL GOLDEN CROSS**

85 days

A Woodruff hybrid resembling Golden Cross Bantam but with creamy, white, tender kernels. Stalks are 7 feet tall, the ears 14-16 rowed and 7½-8 inches long. 12½ lbs. \$9.00; 50 lbs. \$30.00.

**Sencross**

We grow a number of white Hybrid Sweet Corns, which are used mostly for canning, but are also good for market where a white corn is desired. Ask for descriptions and prices.

SWEET CORN

Yellow Varieties

EARLY YELLOW SENSATION

67 days

This has consistently been our best seller among the early yellow varieties. In addition to having excellent quality it is very early. The ear is 6 to 7½ inches long with 10–16 rows, cylindrical to slightly tapered, straight rowed, well filled tips, well covered, more resistant to smut than other varieties; ears average 9 ounces in weight. 12½ lbs. \$4.00; 50 lbs. \$12.00.

IMPROVED GOLDEN BANTAM

78 days

ALL-AMERICA SELECTION (Golden Giant)

An excellent midseason yellow corn with delicious flavor. The ear is 6 to 7 inches long with 12–14 rows. Excepting as to flavor it does not resemble Golden Bantam and is poorly named. It has been growing in favor for several years and is now a popular variety. 12½ lbs. \$4.00; 50 lbs. \$12.00.

EXTRA EARLY BANTAM

65 days

An earlier strain of Golden Bantam with 8–10 rows of kernels. The ear is about 7 inches long, very uniform, similar to Golden Bantam in size, shape and quality. It yields very heavily, beating most varieties to market. 12½ lbs. \$4.00; 50 lbs. \$12.00.

GOLDEN SUNSHINE

67 days

An early yellow, market garden sort. The ears are 6 to 7½ inches long, 10–14 rowed. The kernels are broad and have a good flavor. 12½ lbs. \$4.00; 50 lbs. \$12.00.

GOLDEN BANTAM

75 days

Still the old favorite with many home and market gardeners. Our special stock produces ears 6½–7½ inches long with 8 rows of delicious kernels to the ear. One of the sweetest of all corns and of best quality. 12½ lbs. \$4.00; 50 lbs. \$12.00.

	12½ lbs.	50 lbs.

Early Yellow Sensation

White Varieties

STOWELL'S EVERGREEN

95 days

This is our improved strain of Stowell's with a deeper kernel. An old favorite with home and market gardeners for the main crop. It is also popular with canners. It remains in a green state for a longer period than most sugar corns. The stalks grow about 8 feet tall, bearing ears 8 to 9 inches long, with 14 to 18 rows to the ear. The grains are broad, deep, and of excellent quality. 12½ lbs. \$4.00; 50 lbs. \$12.00.

LONG ISLAND BEAUTY

93 days

A very late and extra large eared corn for certain markets. The ears measure 8 to 10 inches and are thick, 10–18 rows of kernels. 12½ lbs. \$4.00; 50 lbs. \$12.00.

	12½ lbs.	50 lbs.

CORN SALAD

LARGE LEAVED DUTCH

60–65 days

Corn Salad is also called Fetticus. It is used like lettuce in salads or also cooked like spinach. Oz. 45c; ¼ lb. \$1.20; lb. \$4.00.

CUCUMBER

WOODRUFF'S HYBRID

60–64 days

An early variety and much liked in many sections because of its dark green color and symmetrical shape. It grows about 10 inches long and retains its color for several days after picking. Oz. 30c; ¼ lb. 75c; lb. \$2.25.

A & C (COLORADO)

66–68 days

ALL-AMERICA SELECTION Silver Medal 1935

One of the most popular and best varieties of cucumber, used in the South as well as in many other sections. The fruits are from 9 to 11 inches long, slight taper at both ends, dark green in color which it holds very well, making it a fine shipper. Oz. 30c; ¼ lb. 80c; lb. \$2.50.

IMPROVED LONG GREEN

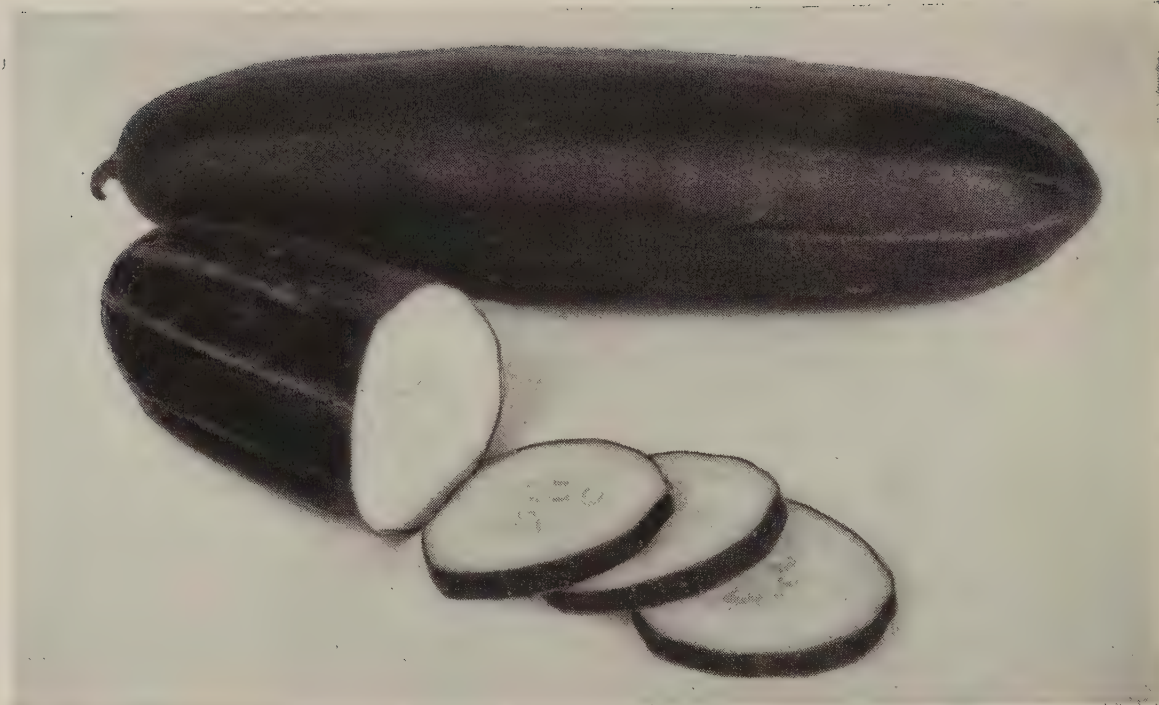

66–69 days

A black spine type with fruit long, straight and dark green. Excellent for pickling, slicing and market. Oz. 30c; ¼ lb. 75c; lb. \$2.25.

STAYS GREEN (Long Strain)

59–62 days

A longer strain of the old Southern favorite shipper. It has the same excellent color and makes a fine shipping variety. The cucumber grows from 8 to 10 inches long. Oz. 25c; ¼ lb. 70c; lb. \$1.75.

A & C Cucumber

STRAIGHT EIGHT

64-68 days

ALL-AMERICA SELECTION Gold Medal 1935

One of the best varieties that has been offered in many years. The cucumbers are about 8 inches long when ready to use, always straight, very cylindrical and smooth and with blunt ends. The color is medium dark green with green rays at the blossom end. Oz. 30c; ¼ lb. 75c; lb. \$2.25.

MARKETER

60-65 days

ALL-AMERICA SELECTION Bronze Medal 1943

A good early prolific variety, unusually trim and uniform. The fruits are slightly tapered to each end and they hold their rich dark green color very well. Oz. 35c; ¼ lb. \$1.00; lb. \$3.00.

CUBIT

60-65 days

ALL-AMERICA SELECTION Bronze Medal 1944

A new attractive, high quality, good shipping variety which has smooth dark green fruits with blunt ends, about 8½ inches long. Its small seed cavity makes it an excellent slicing variety. Oz. 35c; ¼ lb. \$1.00; lb. \$3.00.

NONPAREIL

For Greenhouse

A greenhouse forcing variety of merit. Very dark green, holds its color well, fruits 9 to 11 inches in length. Oz. 70c; ¼ lb. \$2.40; lb. \$8.00.

Pickling Varieties

NATIONAL PICKLING

54-56 days

This variety was originally developed by the National Pickle Packers Association and is the best all-around pickler. The pickles are dark green, cylindrical, and are blocky at both ends in all stages of growth. Oz. 25c; ¼ lb. 70c; lb. \$2.00.

BOSTON PICKLING

58-60 days

A standard black spine pickler, early, with slightly tapered fruits. Not as uniform a cropper as National Pickle. Oz. 25c; ¼ lb. 70c; lb. \$2.00.

CHICAGO PICKLING (Westerfield) 59-62 days

This strain is very prolific and heavily spined at pickling stage. The pickles are uniform, cylindrical, medium green and square ended. Oz. 25c; ¼ lb. 70c; lb. \$2.00.

DAVIS BLEND

54-56 days

A typical black-spined pickler, popular with packers because of its high yield. Fruits are dark green, cylindrical, with blocky ends. Oz. 25c; ¼ lb. 70c; lb. \$2.00.

CARDOON

LARGE SMOOTH

A perennial from the Globe Artichoke family. It is grown for the fleshy leaf stalks. The plants are 3½ to 4½ feet tall, grayish green, stalks almost spineless. Oz. 50c; ¼ lb. \$1.50; lb. \$5.00.

COLLARD

GEORGIA

70-80 days

A non-heading type of the cabbage family, very extensively grown for greens, in home and commercial gardens in the South. It grows upright with loose, cabbage-like leaves. Oz. 30c; ¼ lb. 80c; lb. \$2.50.

SPECIAL CABBAGE

70-80 days

A true heading collard embodying the characteristics of a cabbage, very hard, compact, yet retaining the best collard flavor. It is a rich green color, with light colored rib and veins. Oz. 45c; ¼ lb. \$1.20; lb. \$3.50.

DILL

LONG ISLAND MAMMOTH

The most popular variety. The plants are 2 to 2½ feet tall. Oz. 25c; ¼ lb. 55c; lb. \$1.50.

CHICORY

WITLOOF (French Endive) 140-160 days

Grown as an annual in the South, but the parsnip-like root must be reset in coldframe or greenhouse in the North. The delicate leaf growth is similar to romaine or cos lettuce. Oz. 55c; ¼ lb. \$1.80; lb. \$6.00.

MAGDEBURG (Large Rooted) 65 days

Has roots 12-14 inches long, tapered from 2 inches at the top, which are often ground, roasted and mixed with coffee. Oz. 55c; ¼ lb. \$1.80; lb. \$6.00.

Italian Dandelion

(RADICHETTA or ASPARAGUS CHICORY)

CICCORIA CATALOGNA (Panico Strain)

Developed from Quarantine Strain mainly for its "asparagus" value, and should be sown in spring for that use. May be sown in summer if intended for greens. The leaves are dark green, not as deeply cut as Quarantine, but resembling common dandelion leaves. Has a slender taproot. Oz. 50c; ¼ lb. \$1.35; lb. \$4.50.

CICCORIA, SAN PASQUALE

A very early strain for production of greens from Spring sowing. The leaves are quite broad, irregularly cut and jagged. Oz. 50c; ¼ lb. \$1.35; lb. \$4.50.

CRESS

UPLAND 45-50 days

A dwarf plant, producing small, notched, oval shaped leaves about 2 inches long, with very mild flavor. Used in salads and as a substitute for Water Cress. Oz. 55c; ¼ lb. \$1.80; lb. \$6.00.

WATER 180 days

A hardy, aquatic perennial, used for garnishing and salads. Oz. 90c; ¼ lb. \$3.00; lb. \$10.00.

DANDELION

ARLINGTON THICK LEAF

The best variety for market growers who demand a heavy, attractive, thick-leaved dandelion. Oz. 90c; ¼ lb. \$3.00; lb. \$10.00.

Delivery July 1, 1949

ENDIVE

FULL HEART BATAVIAN 85-90 days

ALL-AMERICA SELECTION Silver Medal 1934

The plant is medium large with a very compact, full heart; the leaves broad and well blanchied. An improved Batavian of very fine quality. Oz. 30c; ¼ lb. 80c; lb. \$2.50.

LARGE GREEN CURLED

(Red Ribbed) 96-100 days

The leaves are large, finely cut, and curled and easily blanch to a creamy white in the center. This is a most popular curled variety. Oz. 25c; ¼ lb. 70c; lb. \$2.00.

GREEN CURLED RUFFEC 96-100 days

A large, late variety with finely curled, compact heart and thick, white ribs. Oz. 30c; ¼ lb. 80c; lb. \$2.50.

EGG PLANT

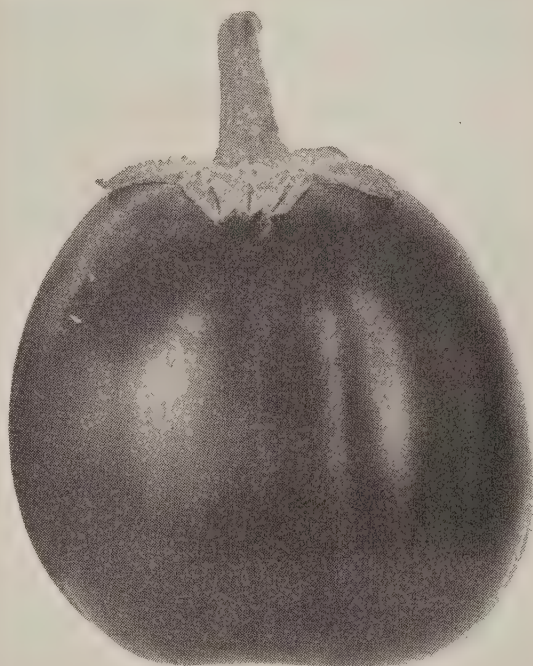

NEW HAMPSHIRE HYBRID 68-73 days

ALL-AMERICA SELECTION Silver Medal 1939

This very early highly productive egg plant is a little smaller than Black Beauty which it resembles, but ideal size for table use. It is the earliest large fruited Egg Plant. ½ oz. 55c; oz. 90c; ¼ lb. \$3.00; lb. \$10.00.

BLACK BEAUTY 80-85 days

The most popular variety and the kind grown most extensively by market gardeners. The fruit is large and handsome and of a deep rich dark purple color. The plants are of robust growth and are very prolific, bearing 4 to 6 fruits on each bush. Our stock is early, ripening large crops before frost. ½ oz. 50c; oz. 70c; ¼ lb. \$2.50; lb. \$8.00.

Black Beauty Egg Plant

EARLY LONG PURPLE 75-80 days

Extra early, bearing slender, pear-shaped fruits 6 to 7 inches long, dark purple in color. It is chiefly used as an early market variety. ½ oz. 50c; oz. 70c; ¼ lb. \$2.50; lb. \$8.00.

BADGER STATE 70-75 days

An early bearer with fewer and less objectionable seeds than in other varieties. Fruits are 6 to 7 inches long, light purple, and become larger, gradually and symmetrically toward the base. ½ oz. 55c; oz. 90c; ¼ lb. \$3.00; lb. \$10.00.

FENNEL

FLORENCE

The true Italian strain, which grows a stalk somewhat like celery, though strongly flavored like anise. It is usually sown in midsummer. Oz. 30c; ¼ lb. 80c; lb. \$2.50.

KALE

SPECIAL DWARF GREEN SCOTCH 55–60 days

A variety of Scotch Kale with leaves of a bright yellowish green, beautifully curled. The plant has a spreading habit, grows close to the ground and withstands frost. Oz. 35c; ¼ lb. \$1.00; lb. \$3.00.

BLUE SCOTCH 55–60 days

We have an excellent and very even stock of this low growing spreading variety, which is the one most commonly grown. The leaves are large, finely curled, of a deep bluish-green color and of excellent quality. It is often used for garnishing. Oz. 35c; ¼ lb. \$1.00; lb. \$3.00.

DWARF SIBERIAN (Early Sprouts) 60–65 days

A hardy and productive variety with bluish-green foliage that grows rapidly and is very slow running to seed in the spring. The leaves are not nearly as curly as the Scotch types listed above. Oz. 25c; ¼ lb. 70c; lb. \$2.00.

TALL SCOTCH

Similar to Dwarf Green Scotch, but grows a plant 24 to 30 inches tall, bearing leaves heavily curled and of bright medium green color. Very tender after being frosted. Oz. 30c; ¼ lb. 80c; lb. \$2.50.

Imperial No. 44

PREMIER GREAT LAKES (WS) 78–83 days

Developed from a selection from Great Lakes by the Pennsylvania Agr. Expt. Station. The heads are unusually solid, round, up to 7" in diameter, and very uniform. It is slow to bolt and has produced up to 90% marketable heads. For upland soils as an early maturing or summer crop. Oz. 70c; ¼ lb. \$2.50; lb. \$8.00.

PENNLAKE (WS) 85–88 days

Developed by the Pennsylvania Agr. Expt. Station from a cross of Great Lakes x Imperial 847. The foliage is crisp and dark, the heads compact and with a greener interior, well protected from scald. Resistant to tip burn, and very uniform. Recommended for early summer or fall crop on upland or muck. Oz. 70c; ¼ lb. \$2.50; lb. \$8.00.

PROGRESS (WS) 80 days

Released by U.S.D.A. and the N. J. Agr. Expt. Station, this Imperial type is an early, dark green, tipburn-resistant variety of great merit. It has done especially well in New Jersey as an early variety. As compared with Imperial 44, it is darker green, thicker leaved and of better quality. Oz. \$1.00; ¼ lb. \$3.60; lb. \$12.00.

Butter-Heading Varieties

BIG BOSTON (WS) 74–77 days

The heads are medium size, compact, the outer leaves are light green edged with brown, excellent quality. Oz. 25c; ¼ lb. 70c; lb. \$2.00.

WHITE BOSTON (WS) 73–76 days

A superior strain of white seeded Boston, remarkably free from tip burn and bottom rot. Light green leaves without edge tinge. It stands long without bolting and is fine for Spring sowing in the field. Oz. 30c; ¼ lb. 80c; lb. \$2.50.

LETTUCE

Cabbage-Heading Varieties

NEW YORK NO. 12 (WS) 78–81 days

An early, sure heading strain of the popular New York Lettuce. More adapted to summer weather than the original strain. It forms somewhat flat, exposed heads with rather light green thin leaves. Oz. 40c; ¼ lb. \$1.10; lb. \$3.25.

IMPERIAL NO. 44 (WS) 80–83 days

This is a type of Iceberg Lettuce developed by the U. S. Department of Agriculture that seems to be very adaptable to the eastern climate and soil. It makes heads better than any other strain and shows marked resistance to tip burn. The heads are solid and of fine quality. Oz. 45c; ¼ lb. \$1.20; lb. \$3.40.

IMPERIAL NO. 456 (WS) 82–85 days

Originally developed for use in New York state by those who wish to grow head lettuce in the summer months, it withstands heat better than Imperial No. 44 and is resistant to tip burn. Oz. 50c; ¼ lb. \$1.35; lb. \$4.50.

IMPERIAL NO. 847 (BS) 83–86 days

A medium large, hard heading variety that does quite well in hot weather and is resistant to tip burn. It produces heads of good size and solidity where other strains fail. It is a little later than New York 44 and has larger heads. Oz. 45c; ¼ lb. \$1.20; lb. \$3.40.

BLACK SEEDED BIG BOSTON (BS) 75-78 days

One of our specialties. Fine for Fall or Winter sowing in cold frames and best for transplanting. The heads are somewhat larger than Big Boston. Matures very uniformly. Oz. 35c; ¼ lb. \$1.00; lb. \$3.00.

MAY KING (WS)

62-65 days

A very early variety. The heads form very quickly, are firm and of fine quality. The plant is small and practically all head, the leaves are light green, slightly tinged with brown on the edges, and are very crisp and tender. Oz. 35c; ¼ lb. \$1.00; lb. \$3.00.

Loose-Leaf Varieties**GRAND RAPIDS, U. S. NO. 1 (BS)** 45 days

An improved strain especially recommended for either outdoors or under glass. It has a larger frame and leaves more finely frilled at the edges than the old strain. It is slower to bolt to seed. Oz. 35c; ¼ lb. \$1.00; lb. \$3.00.

BLACK SEEDED SIMPSON (BS)

43-46 days

One of the most attractive varieties for early planting. The leaves are large, frilled and crumpled. A good variety for home or market garden. Oz. 25c; ¼ lb. 70c; lb. \$2.00.

Romaine or Cos Varieties**DARK GREEN COS (WS)**

65-70 days

The heads are medium large, cylindrical with long tapered tip, well closed and solid. The outer leaves are very dark green, long, finely savoyed. The interior is creamy to golden yellow, crisp with endive-like flavor. Oz. 30c; ¼ lb. 75c; lb. \$2.25.

PARIS WHITE COS (WS)

65-70 days

The most popular variety of this type and widely used. The heads are similar to Dark Green Cos with medium to light green foliage. Oz. 30c; ¼ lb. 75c; lb. \$2.25.

ONION

Yellow Varieties**WOODRUFF'S EARLY YELLOW GLOBE** 95-100 days

This variety which we introduced a few years ago, continues to produce a crop when other varieties fail. It is a fine, globe shaped onion with beautiful yellow skin. It matures at least two weeks earlier than Yellow Globe Danvers and keeps well. Oz. 45c; ¼ lb. \$1.30; lb. \$4.25.

VICTORY (Japanese)

100-105 days

Introduced by Woodruff in 1916 and extensively used for sets. The bulb is yellow, flattened, a heavy yielder and a fair keeper. The skin is dark yellow with creamy yellow flesh, crisp and very sweet. Oz. 40c; ¼ lb. \$1.10; lb. \$3.25.

UTAH SWEET SPANISH

113-118 days

An improved strain of Sweet Spanish, larger, more uniform and producing fewer double onions. Oz. 50c; ¼ lb. \$1.35; lb. \$4.50.

BRIGHAM YELLOW GLOBE

110-115 days

Also called Michigan Yellow Globe, this fine onion is noted for its long keeping qualities. It is a deep globe with a very heavy skin of excellent dark yellow color. It matures about the same time as Yellow Globe Danvers and has become one of the most popular varieties. Oz. 45c; ¼ lb. \$1.30; lb. \$4.25.

SOUTHPORT YELLOW GLOBE

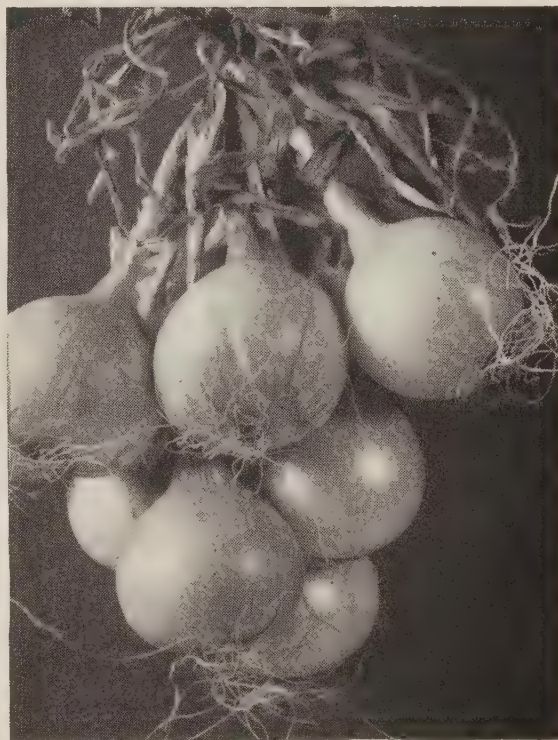

115-120 days

One of the standard main crop onions, deep globe shape and excellent color. It is late in maturing but stores and ships well. Oz. 45c; ¼ lb. \$1.20; lb. \$3.75.

GOLDEN MARVEL

115-120 days

An excellent yellow onion with a deep globe shape and of excellent keeping qualities. It is thick skinned and matures in the same season as Southport Yellow Globe. Oz. 45c; ¼ lb. \$1.20; lb. \$3.75.

Woodruff's Early Yellow Globe Onion

MELZER YELLOW GLOBE

105 days

A medium sized, flattened globe, with a coppery-yellow, medium thick skin. An excellent variety. Oz. 45c; ¼ lb. \$1.30; lb. \$4.25.

White Varieties**WHITE VICTORY (White Japanese)**

100 days

We now offer a white onion similar to our famous Victory or Yellow Japanese. This new variety is clear white, flattened shape, and with a somewhat stronger top than the well known White Portugal. Oz. 45c; ¼ lb. \$1.20; lb. \$4.00.

ONIONS — Continued

Evergreen White Bunching

SOUTHPORT WHITE GLOBE 112-177 days

The standard large, white, globe shaped onion. While it does not keep in storage as well as the yellow varieties, it is the best of the whites for that purpose. The bulbs are medium large, a beautiful globe shape, very solid, with a thin silvery white skin. The flesh is waxy white, fine grained, crisp and quite mild. Oz. 50c; ¼ lb. \$1.35; lb. \$4.50.

WHITE LISBON 95-100 days

Grown almost entirely as an early bunching onion, but the bulbs, if left to mature, are globular and clear white. Oz. 50c; ¼ lb. \$1.35; lb. \$4.50.

WHITE QUEEN (White Pearl) 90 days

An early variety, used mostly for pickling, but occasionally for bunching. Has a very mild and sweet flavor, small bulbs, which are solid, clear white, flat and most attractive. Oz. 50c; ¼ lb. \$1.35; lb. \$4.50.

WHITE PORTUGAL (Silverskin) 100 days

A popular flat, white onion of medium size and mild, pleasant flavor. It is used mostly for bunching and pickles. A good keeper. Oz. 45c; ¼ lb. \$1.20; lb. \$4.00.

EVERGREEN WHITE BUNCHING

A bulbless perennial which forms long, leek-like, silvery white stalks used for bunching. The onions are produced in clusters of 4 to 9 and are twice the size of ordinary bunching onions. Sow in late summer. Oz. 45c; ¼ lb. \$1.20; lb. \$3.50.

WHITE SWEET SPANISH 110-115 days

The largest of the white varieties, although late maturing. A white globe onion with a small neck. It has fine white flesh and is a fair keeper. Oz. 50c; ¼ lb. \$1.50; lb. \$5.00.

Red Varieties

EARLY RED GLOBE 95-100 days

This is the red companion to our Early Yellow Globe. It is medium red and has a flattened globe shape. Fine for early marketing or shipping. Oz. 45c; ¼ lb. \$1.20; lb. \$3.75.

SOUTHPORT RED GLOBE 113-118 days

The bulb has a rich purplish red color, is almost round as a ball, and keeps very well. It is one of the best red varieties. Oz. 45c; ¼ lb. \$1.20; lb. \$3.50.

RED WETHERSFIELD 100-105 days

A well known variety with bright, purplish red skin. It is flat in shape, but thick, with very firm flesh. An excellent keeper. Oz. 45c; ¼ lb. \$1.20; lb. \$3.50.

ONION SETS

VICTORY (Yellow Japanese)

Introduced by us in 1916 as Japanese onion sets, and have for years been the standard yellow set in this country. The onions produced are flattened, of medium size, with yellow skin and creamy yellow flesh. Fine for home or early market, but not recommended for winter storage.

GOLDEN GLOBE

A splendid yellow variety, producing attractive and high quality globe-shaped onions.

YELLOW

The ordinary yellow onion set, producing flat and attractive onions.

RED

The standard red variety, from which flat, red onions grow.

WHITE VICTORY

A superior, slower growing white set, thick necked and strong, with a larger top than ordinary white sets.

Write for Prices of Onion Sets

KOHL RABI

EARLY WHITE VIENNA 55-60 days

The bulbs are ready to use when they are the size of a small apple. The quality is good, being tender and of delicate flavor. Oz. 50c; ¼ lb. \$1.35; lb. \$4.50.

EARLY PURPLE VIENNA 59-63 days

A small purple leaved plant with globular purple bulb. The flesh is tender, crisp, white and flavorful. Oz. 50c; ¼ lb. \$1.35; lb. \$4.50.

LEEK

AMERICAN FLAG 140-155 days

A popular strain having long, thick, well branched stem with large medium green, drooping leaves. The stems are 7 to 8 inches long and 1 to 1½ inches thick. Oz. 60c; ¼ lb. \$1.95; lb. \$6.50.

ITALIAN MAMMOTH 140-155 days

Has a stalk that is both thick and tall, bleaching as much as twelve inches. It has the good quality of standing a long time in good condition, and is one of the most attractive in appearance. The leaves are large and broad. Oz. 65c; ¼ lb. \$2.25; lb. \$7.50.

MUSTARD

GIANT SOUTHERN CURLED (Long-Standing)

ALL-AMERICA SELECTION Gold Medal 1935 60-70 days

A favorite in the South, growing very large, with beautifully curled leaves of good flavor. Our strain is slow-seeding. Oz. 25c; ¼ lb. 70c; lb. \$2.00.

FORDHOOK FANCY

60-70 days

A fine variety with leaves that resemble a beautiful ostrich plume. It is very productive and late seeding. Oz. 25c; ¼ lb. 55c; lb. \$1.50.

TENDERGREEN

45-55 days

A vegetable of Oriental origin, a very mild mustard with a creamy spinach flavor, formerly called Mustard Spinach. The large oblong leaves are very dark green in color, fairly smooth with small white midribs. It is used in the South the same as turnip greens. Oz. 25c; ¼ lb. 70c; lb. \$1.85.

OKRA or GUMBO

CLEMSON SPINELESS

50-55 days

ALL-AMERICA SELECTION Silver Medal 1939

An improved strain of Perkins type of Long Pod Okra growing 4 feet tall with uniform rich green pods. It is very prolific and can be picked without the annoyance of prickly spines. Oz. 20c; ¼ lb. 40c; lb. \$1.00.

PERKINS MAMMOTH PODDED

62-67 days

A strong grower, often reaching over 4 feet in height and it yields better than any other variety. The bush is literally covered with pods from 7 to 8 inches long. The color is an intense green and the quality is excellent. Oz. 20c; ¼ lb. 40c; lb. \$1.00.

Dwarf Long Podded Okra

DWARF LONG PODDED

50-55 days

An early dwarf growing sturdy variety, producing an abundance of long-fluted, dark green pods. It is especially recommended for home garden use because the pods remain in fine condition for cooking or canning until quite large. Oz. 20c; ¼ lb. 40c; lb. \$1.00.

WHITE VELVET

55-58 days

The best and earliest white Okra and splendid for the family or market. The plant grows about 4 feet tall, and the pods are long, smooth and tender. Oz. 20c; ¼ lb. 40c; lb. \$1.00.

PARSLEY

PARAMOUNT

80-90 days

ALL-AMERICA SELECTION Silver Medal 1936

A fine parsley of the triple-curved type, of unusually dark green color. It is remarkably uniform, has a good stout stem for bunching and will not tip-burn or burn brown at the edges with age or in cool fall weather. The plants grow about 12 inches high when thinned and have a spread of about 20 inches. Oz. 20c; ¼ lb. 50c; lb. \$1.35.

Paramount Parsley

MOSS CURLED (Double Curled)

70-80 days

This variety grows to a height of about 8 inches. The color is a rich dark green, and the leaves are finely cut. It is used for garnishing and flavoring. One of the best varieties of curled parsley. Oz. 20c; ¼ lb. 50c; lb. \$1.35.

HAMBURG PARSNIP ROOTED

85-95 days

The foliage is like parsley, but the plants form edible roots resembling slender parsnips in shape and color. It is used for flavoring soups and stews and may be stored in winter. Oz. 25c; ¼ lb. 55c; lb. \$1.50.

PLAIN LEAF

75-85 days

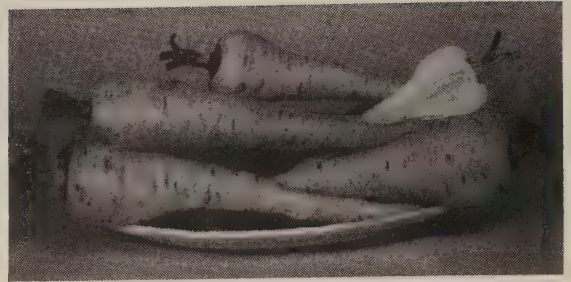

A strong hardy plant, excellent for seasoning, but not as attractive as the curled varieties for garnishing. Oz. 20c; ¼ lb. 50c; lb. \$1.35.

PARSNIP

ALL AMERICAN

125-130 days

This newer variety is in great demand in many localities because of its white smooth appearance. The roots are somewhat more slender than Hollow Crown and remarkably free from side roots. Oz. 25c; ¼ lb. 70c; lb. \$2.00.

All American Parsnip

HOLLOW CROWN

130-135 days

The oldest and best known variety, the roots being 8 to 10 inches in length. They are pure white, smooth and of excellent flavor, used for the table and for feeding. Oz. 25c; ¼ lb. 65c; lb. \$1.75.

WHITE MODEL

125-130 days

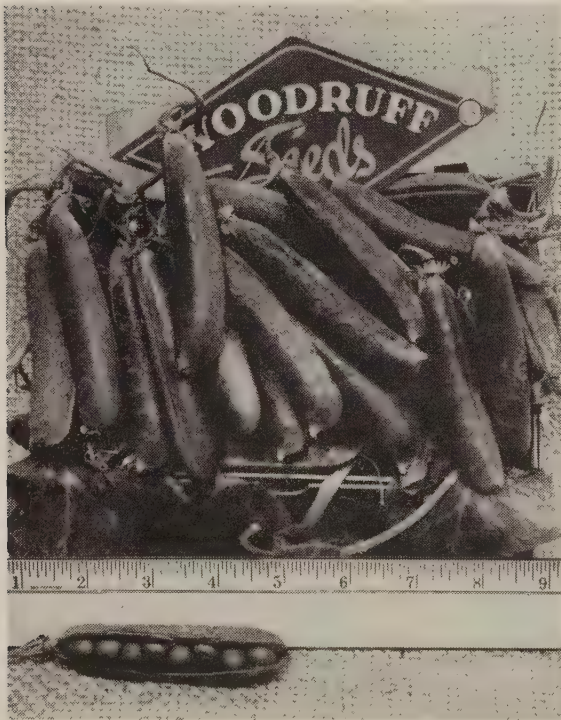

This variety is considered an improvement over Hollow Crown being of medium length, smooth and pure white. Free from side roots. Oz. 25c; ¼ lb. 65c; lb. \$1.75.

PEAS

WORLD'S RECORD

58-61 days

An improved strain of the well known Gradus. The pointed pods are medium dark green; average about 3¾ inches in length, and usually contain 7 or 8 large peas of exceptionally fine quality. The vine is from 28 to 33 inches tall. 14 lbs. \$4.50; 56 lbs. \$15.00.

Thomas Laxton Peas

THOMAS LAXTON (Dark Podded)

58-62 days

One of the most popular market, home garden and shipping varieties. Our strain has been bred for that desired dark green color which commands the highest market price. The pods are 3½ inches long, dark green and attractive. The vine is from 33 to 38 inches tall. 14 lbs. \$4.00; 56 lbs. \$12.50.

LAXTONIAN (Blue Bantam)

60-62 days

Our strain of this popular variety has dark green pods, averaging 3¾ inches in length and usually contain 7 to 8 large peas. 14 lbs. \$4.50; 56 lbs. \$14.00.

LAXTON'S PROGRESS

60-62 days

This is the largest and one of the best of the medium early dwarf varieties. The vines are from 15 to 18 inches high and the pods are 4 to 5 inches long, deep green and well filled with dark green peas of high quality. 14 lbs. \$4.50; 56 lbs. \$14.00.

GREATER PROGRESS

60-62 days

A large attractive wrinkled pea similar to the Laxton's Progress. It has a fine quality and a nice appearance. 14 lbs. \$4.50; 56 lbs. \$14.00.

LAXTON'S SUPERB (Early Bird)

57-60 days

A smooth-seeded, early and hardy variety that produces light green pods 3½-4 inches long, with vines 19-23 inches tall. 15 lbs. \$4.50; 60 lbs. \$15.00.

EASY MONEY

62-66 days

This has been a favorite variety among our customers for many years. The pods are about 4 inches long, with a fine dark green color. The vine is from 22 to 26 inches tall. 14 lbs. \$4.50; 56 lbs. \$15.00.

SPECIAL K.

58-61 days

One of the most popular extra early large podded peas both for home gardens and commercial growers. The vines are 28 to 33 inches tall and the pods are 3½ to 4 inches long, filled with large peas which are very sweet and tender. 14 lbs. \$4.50; 56 lbs. \$15.00.

LITTLE MARVEL

61-63 days

A dwarf variety with vines only 15-18 inches high. Pods are about 3 inches long and contain 6-8 tightly packed peas. Excellent quality. 14 lbs. \$4.50; 56 lbs. \$14.00.

A portion of our extensive Pea variety trials and breeding grounds near Sacramento, Calif.

WANDO

70-72 days

An excellent variety for market or freezing if a small pea is desired. The vines are 24-30 inches tall, the pods $3\frac{1}{2}$ inches long, dark green, and containing about 8 peas per pod. 14 lbs. \$4.50; 56 lbs. \$14.50.

DON'T OVERLOOK

the new varieties listed on page 33, and

CASERTA SQUASH, the first vegetable variety to win an All-America Selections Gold Medal since 1935. See page 26.

Alderman Peas

ALDERMAN (Wilt Resistant)

74-76 days

This is a dark pod Telephone and it is by far the best variety of this type, yielding more than any other kind. The pods are large pointed, $4\frac{1}{2}$ to $5\frac{1}{2}$ inches long, and contain 8 to 10 large peas. The vines are 54 to 60 inches tall, of robust growth and very prolific. Matures medium late. 14 lbs. \$4.50; 56 lbs. \$15.00.

IMPROVED TELEPHONE

73-77 days

The most popular late variety. The pods are $4\frac{1}{2}$ to $5\frac{1}{2}$ inches long, straight, dark green, tapered point at tip. The vines are 42 to 48 inches tall, moderately heavy stem with profuse foliage, medium to dark green. 14 lbs. \$4.50; 56 lbs. \$15.00.

WYOMING WONDER (Wilt Resistant)

74-76 days

An extra large podded, late variety, used for main crop. It is a member of the Giant Stride family selected from English stock, but greatly improved by careful breeding work. The pods are $4\frac{1}{2}$ to $5\frac{1}{2}$ inches long, are dark green and contain 8 to 10 large extra sweet peas. The vine is 24 to 28 inches tall. 14 lbs. \$4.50; 56 lbs. \$14.00.

Wyoming Wonder Peas

PEPPER

Sweet Varieties

WORLDBEATER

73-78 days

The best all-around large pepper for either the home or market garden. The flesh is thick, mild and sweet. One of the leading shipping varieties in the South. ½ oz. 40c; oz. 55c; ¼ lb. \$1.80; lb. \$6.00.

CALIFORNIA WONDER

72-76 days

This variety has thick side walls, fruits 3½ to 4 inches in diameter, 4 to 4½ inches long, very blocky, mostly 4 lobed, upright, thick flesh, flavorful and very mild, glossy deep green color becoming red at maturity. ½ oz. 50c; oz. 70c; ¼ lb. \$2.50; lb. \$8.00.

EARLY CALWONDER

65-68 days

An excellent pepper of the California Wonder type; a week earlier and more productive. The fruits while not quite as large, have the same thick flesh and are smooth and sweet. ½ oz. 50c; oz. 70c; ¼ lb. \$2.50; lb. \$8.00.

WINDSOR "A"

58-62 days

ALL-AMERICA SELECTION Silver Medal 1937

A popular local market type developed by the Connecticut Agriculture Experiment Station. It is about the shape and size of Ruby King, with the thicker side walls of California Wonder, although lighter green in color. It is smooth shaped, mostly three lobed. It bears a tremendous crop of early fruit. Where the season is short it is especially recommended. ½ oz. 50c; oz. 70c; ¼ lb. \$2.50; lb. \$8.00.

ILLINOIS F 5

58-60 days

A very heavy yielding pepper, with fruits 3 to 4 lobed, 4½ to 5 inches long by 3½ to 4 inches. Has a fine crimson-red color, medium thick walls, and 45 fruits will fill a bushel. It has the quality of always bearing maturing fruits, instead of dropping one set and then maturing another. It is not recommended for the farthest north states. ½ oz. 60c; oz. \$1.00; ¼ lb. \$3.60; lb. \$12.00.

Illinois F 5 Pepper

KING OF THE NORTH

65-70 days

An early heavy bearing variety that will produce an abundance of green fruit early in the season. The peppers are large, dark green turning to a deep rich red when ripe. The flesh is medium thick, mild and sweet. ½ oz. 40c; oz. 55c; ¼ lb. \$1.80; lb. \$6.00.

California Wonder Pepper

SWEET CHEESE (Sunnybrook)

75-80 days

This prolific pepper is uniform and has a good scarlet color. The flesh is thick and sweet. The fruit has a squashed down or tomato shape 3" wide by 1½" deep. ½ oz. 50c; oz. 70c; ¼ lb. \$2.50; lb. \$8.00.

PENN WONDER

60 days

A new Penn State introduction, bearing bell-type fruits of medium size and thick walled. Fruits point down and break off easily with little damage to plant. Fine for early crop. ½ oz. 60c; oz. \$1.00; ¼ lb. \$3.60; lb. \$12.00.

TRUHART PIMIENTO

71-75 days

A bright red heart shaped Pimiento type, with a very large bush and fruit. ½ oz. 50c; oz. 70c; ¼ lb. \$2.50; lb. \$8.00.

LARGE SWEET YELLOW

70 days

A sweet, yellow-fruited variety of the California Wonder type. The fruits are about 4 x 3 inches, sometimes tapering slightly, and mostly 4-lobed. The mild flesh is about ⅛ inch thick. When "green", the fruits are a canary yellow, later turning brilliant crimson. Oz. 90c; ¼ lb. \$3.00; lb. \$10.00.

"Hot" Varieties

HUNGARIAN WAX

61-65 days

The fruits are about 5 to 6 inches long, turning from green to light yellow when young and then red as they ripen. ½ oz. 50c; oz. 70c; ¼ lb. \$2.50; lb. \$8.00.

CAYENNE (Large Thick or Finger)

70-74 days

The popular Finger strain of Cayenne, with fruits 6 to 8 inches long, inclined to be smooth and curved. The fruits have thicker flesh than Long Thin Cayenne and twice as much flesh, but not quite as pungent. ½ oz. 40c; oz. 55c; ¼ lb. \$1.80; lb. \$6.00.

LARGE RED CHERRY

80-84 days

Our special strains of this variety for market gardeners. The fruits are globular to flattened globe shaped and very productive. ½ oz. 50c; oz. 70c; ¼ lb. \$2.50; lb. \$8.00.

PUMPKIN

EARLY CHEYENNE

80-90 days

An early prolific inbred from Small Sugar, developed at U. S. Horticultural Field Station, Cheyenne, Wyoming. It is the finest quality winter pie or baking pumpkin developed to date. It stands adverse weather well, particularly cold. The fruits measure 5 to 7 inches across, 2 to 4 inches deep. Oz. 25c; ¼ lb. 55c; lb. \$1.50.

Early Cheyenne Pumpkin

CONNECTICUT FIELD

112-120 days

The variety most commonly used, large ribbed, deep orange in color, thick fleshed, coarse and sweet. It is excellent for cooking or stock feed. Oz. 20c; ¼ lb. 50c; lb. \$1.40.

SMALL SUGAR (New England Pie)

115-118 days

The favorite pie pumpkin. A small deep yellow pumpkin, ribbed and slightly flattened at the ends. It has good thick sweet flesh that is excellent for pies. Oz. 20c; ¼ lb. 50c; lb. \$1.25.

KING OF THE MAMMOTHS

115-120 days

The largest of all pumpkins, sometimes called Jumbo or Potiron. The pumpkins are slightly ribbed, of flattened, globular shape, with light mottled yellow skin and deep coarse orange flesh. Oz. 25c; ¼ lb. 70c; lb. \$2.00.

LARGE CHEESE

108-112 days

Our strain of this flat pumpkin is very popular over the whole country. The fruits are very flat, with heavy ribbing, dull orange surface with heavy bloom. The flesh is dull orange color, very thick and of good flavor. 25c; ¼ lb. 55c; lb. \$1.50.

SALSIFY

MAMMOTH SANDWICH ISLAND

150-180 days

The commonly cultivated variety; slow growing, hardy. It has long, tapering, fleshy roots and stores well. When used in soups, it gives a flavor similar to oysters. Oz. 50c; ¼ lb. \$1.50; lb. \$5.00.

SORREL

NARROW LEAF

55-70 days

We have been supplying our special strain of this variety to our market gardener customers for many years. The plants produce long, slender, bright apple green to medium green, thick, curled-edge leaves of mildly acid flavor. Oz. 55c; ¼ lb. \$1.65; lb. \$5.50.

RADISH

WOODRUFF'S BEAUTY

21-23 days

Our EXTRA SPECIAL strain of short top Scarlet Globe type, for the most particular specialist growers. Very uniform as to top and root, grown from specially transplanted stock. We consider it the best early market radish at present. ¼ lb. 30c; lb. 75c.

Woodruff's Beauty

CHERRY BELLE

23-25 days

ALL-AMERICA SELECTION Bronze Medal 1947

A Saxa type with round, very uniform roots, slightly lighter than Scarlet Globe. Fine for the greenhouse and for late spring, summer, or early fall sowing, but not recommended for early spring sowing, as cold weather retards its growth. Oz. 20c; ¼ lb. 50c; lb. \$1.25.

EARLY SCARLET GLOBE

23-26 days

A carefully selected stock of Scarlet Globe, with a medium top. It is uniform, early and practically free from off-color roots. Will satisfy the most critical market garden trade. Oz. 15c; ¼ lb. 30c; lb. 75c.

FORCING SCARLET GLOBE

21-23 days

Our special strain with a short top for greenhouse use. Will also give very satisfactory results for outdoor use when a short top radish is wanted. ¼ lb. 30c; lb. 75c.

RADISH — Continued

SAXA

21–23 days

A popular short-topped radish both for forcing and outdoor use. The root is globe shaped with a bright scarlet color. Owing to its earliness and short top it is rapidly gaining favor. ¼ lb. 30c; lb. 75c.

SPARKLER (White Tip)

25–28 days

An excellent white tipped variety with ball shaped root. The upper part is bright scarlet and the bottom third is clear crisp white. It is early and has a small to medium top. ¼ lb. 30c; lb. 75c.

Sparkler (White Tip) Radish

FRENCH BREAKFAST

24–27 days

An olive shaped variety which grows about 1½ inches long. It is a quick grower, deep scarlet color with a white tip. ¼ lb. 25c; lb. 60c.

Long Varieties

WHITE ICICLE

27–30 days

This variety has long, white, waxy roots 6 to 7 inches long and tapering. The flesh is clear white and brittle ¼ lb. 30c; lb. 75c.

WHITE STRASBURG

35–40 days

An attractive white summer variety, similar to Icicle but thicker and shorter. It has medium tops. ¼ lb. 40c; lb. \$1.00.

CINCINNATI MARKET

28–30 days

(Long Scarlet Short Top)

It grows a short top, with a scarlet colored root 6 to 7 inches long and quite slender. The flesh is white, crisp and tender. ¼ lb. 25c; lb. 60c.

Fall and Winter Varieties

ROUND BLACK SPANISH

53–58 days

Our stock of this variety is one of which we are proud. The radish is round, 3 to 4 inches in diameter. The skin is a rich black color with very clear white flesh. The flavor is excellent and the radish keeps well. ¼ lb. \$1.00; lb. \$3.00.

LONG BLACK SPANISH

55–60 days

A popular winter variety that keeps well. The roots are about 8 to 10 inches long, cylindrical with tapered tips. It is from 2 to 2½ inches in diameter. The flesh is white, pungent, crisp and solid. ¼ lb. 70c; lb. \$2.00.

MAINE SEED POTATOES

IRISH COBBLER (Certified)

75 days

The most popular early variety. It is a round potato, is very productive, with white flesh of good quality. Our strain of this variety is very pure with practically no white blossoms.

GREEN MOUNTAIN (Certified)

90 days

This large, oval-shaped, medium late potato is probably the most satisfactory for the main crop. It is of exceptionally fine table quality, very productive, having few small tubers.

CHIPPEWA (Maine Certified)

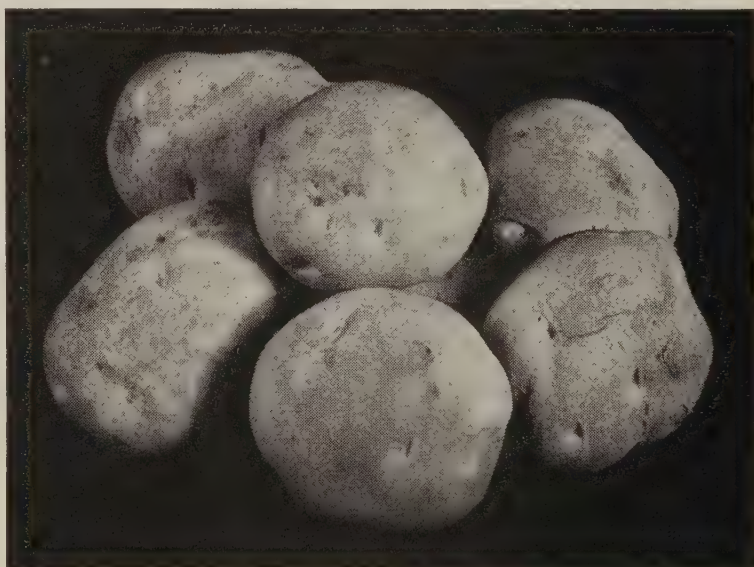

90 days

SEBAGO (Maine Certified)

90 days

KATAHDIN (Maine Certified)

90 days

Irish Cobblers

WRITE FOR PRICES OF LARGE QUANTITIES

SPINACH

HARLEM MARKET

40-43 days

The plants of this variety are more erect and vigorous than Bloomsdale Long Standing, but otherwise they are very similar in type, usually holding a day or two longer than that variety. The leaves also resemble Bloomsdale Long Standing, glossy dark green, very thick and extremely crumpled, rounded incurved tip, tender and of good quality. Prickly seeded. Lb. 55c; 10 lbs. \$5.00; 25 lbs. \$11.25; 100 lbs. \$40.00.

SUMMER SAVOY

42-45 days

ALL-AMERICA SELECTION Bronze Medal 1937

A new and better strain of Long Standing Bloomsdale or Savoy. It has a darker green color, greater uniformity of plant growth, and will stand several days longer without bolting to seed. Lb. 55c; 10 lbs. \$5.00; 25 lbs. \$11.25; 100 lbs. \$40.00.

VIRGINIA BLIGHT RESISTANT

(Blight Resistant Savoy)

36-40 days

This variety was developed by Dr. H. H. Zimmerley of the Virginia Truck Experiment Station as a Savoy type resistant to blight or yellows. It goes to seed quickly in hot weather and on that account is used principally for fall planting. It is a rapidly maturing strain resistant to cold. Lb. 55c; 10 lbs. \$5.00; 25 lbs. \$11.25; 100 lbs. \$40.00.

BLOOMSDALE RESELECTED or SAVOY

39-42 days

This standard variety with attractive crumpled leaves is early and has a fine dark green color. It is used for early and late planting as it does not stand the heat well. Lb. 55c; 10 lbs. \$5.00; 25 lbs. \$11.25; 100 lbs. \$40.00.

OLD DOMINION (Blight Resistant)

40-42 days

A yellows-resistant variety also developed by Dr. H. H. Zimmerley of the Virginia Truck Experiment Station. It is a cross between Virginia Savoy and King of Denmark and possesses the blight resistance of Virginia Savoy and the late seeding characteristics of the King of Denmark. The leaves are dark green and crumpled or savoyed except at the tip. Should be sown in late fall or early spring. Lb. 60c; 10 lbs. \$5.50; 25 lbs. \$12.50; 100 lbs. \$45.00.

EXTRA DARK GREEN BLOOMSDALE

39-42 days

A special and extra dark green strain of Bloomsdale spinach. It resembles Reselected Bloomsdale, but is more uniform and will stand longer, besides having a darker color. Lb. 55c; 10 lbs. \$5.00; 25 lbs. \$11.25; 100 lbs. \$40.00.

Bloomsdale Reselected Savoy

NOBEL GIANT LEAVED

45-48 days

ALL-AMERICA SELECTION Silver Medal 1939

A quick growing variety, very productive, and slow to bolt to seed. The leaves are medium thick, medium green, very large, broad, smooth with slight crumpling, tapered to rounded tip, good quality. Lb. 55c; 10 lbs. \$5.00; 25 lbs. \$11.25; 100 lbs. \$40.00.

KING OF DENMARK

45-48 days

Very slow to go to seed. Leaves medium size, arrow shaped, very dark green. Lb. 60c; 10 lbs. \$5.50; 25 lbs. \$12.50; 100 lbs. \$45.00.

VIKING

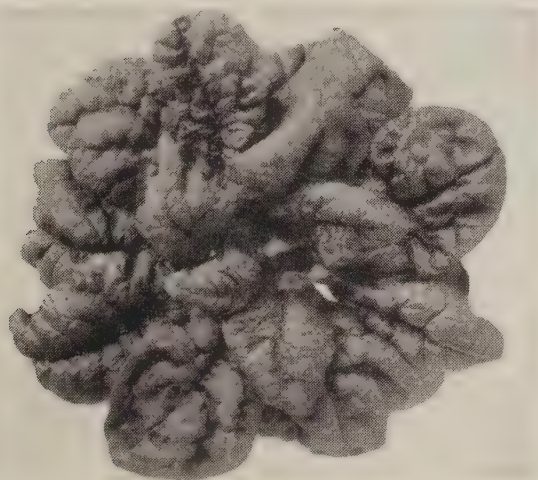

44-46 days

ALL-AMERICA SELECTION Silver Medal 1935

Produces very large and vigorous plants, heavy yielding and slow to bolt to seed. The leaves are very large, broad, thick, dark green and partially crumpled. Highly recommended. Lb. 60c; 10 lbs. \$5.50; 25 lbs. \$12.50; 100 lbs. \$45.00.

NEW ZEALAND

Not a true Spinach, but a variety that thrives in hot weather. A large, freely branched, spreading plant that produces a succession of small, very thick and fleshy, pointed leaves on round fleshy stems. The leaves and tips of branches are picked for cooking like Spinach. Lb. 60c.

Bloomsdale Long Standing

BLOOMSDALE LONG STANDING

42-45 days

A slow seeding Savoy type, and we consider it the best all-around late seeding spinach. The plants are erect, compact, vigorous growing, bolting to seed 10 to 14 days later than regular Bloomsdale Reselected. The leaves are thick, glossy dark green, medium large, heavily savoyed, crumpled, tender and of good quality. Lb. 55c; 10 lbs. \$5.00; 25 lbs. \$11.25; 100 lbs. \$40.00.

SUMMER SQUASH

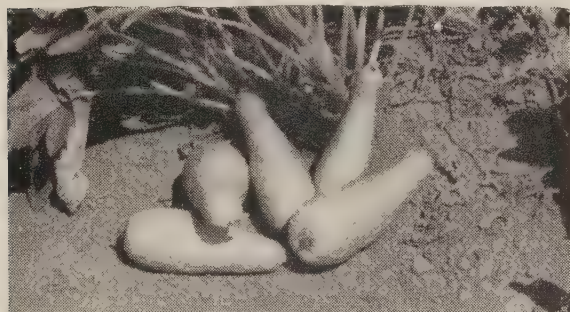

CASERTA  Gold Medal 1949

50 days

Developed by Dr. L. C. Curtis of Connecticut and introduced by us, this new squash is of the Cocoselle type but much earlier and much more prolific. The plant is bush type, making cultivation and spraying easier. The fruits are 6-7 inches long and 1-1¼ inches thick at the market stage, and are a light, glossy green with broken stripes of dark green. In the market, it appears fresh long after picking, and it makes an easy and attractive pack. The early yield is outstanding, and the total yield exceeds that of Cocoselle considerably. Thirty fruits from one plant are not unusual. Ten to 14 days earlier than Cocoselle, and its deeply cut leaves make it resistant to wind damage. Oz. 50c; ¼ lb. \$1.50; lb. \$5.00.

EARLY PROLIFIC STRAIGHTNECK 51-55 days**ALL-AMERICA SELECTION** Silver Medal 1938

An inbred strain of Giant Straightneck, which is a decided improvement. The fruits are 8 to 10 inches long, 2 to 2½ inches in largest diameter. It is long, slender, pear-shaped, with rounded or abruptly tapered tip; smooth or sparsely warted; light yellow in the edible stage. Oz. 25c; ¼ lb. 65c; lb. \$1.75.

*Early Prolific Straightneck***GIANT SUMMER STRAIGHTNECK** 59-65 days

This summer squash has now almost entirely replaced the old Crookneck type, in both home and commercial gardens. It differs from the old Crookneck only in shape; the neck instead of being curved is straight. The fruit is of large size and light yellow in color. On account of the straight neck, it is freer from breakage after being packed. Oz. 25c; ¼ lb. 55c; lb. \$1.50.

EARLY SUMMER CROOKNECK 52-56 days

The leading shipping variety used in the South, also popular in many other sections for home garden or market. The fruits are 8 to 10 inches long by 2½ to 3 inches largest diameter. They are long, slim, pear-shaped, with curved neck, heavily warted, medium yellow in the edible stage, becoming dark or orange yellow when reaching full maturity. Oz. 20c; ¼ lb. 50c; lb. \$1.40.

COCOZELLA VEGETABLE MARROW**(San Pasquale Strain)**

60-64 days

A delicate and finely flavored summer squash for home or market garden. It is also a very popular shipping variety, especially in the South. The plant is of bush type without runners. The fruit is long and slender, mottled with dark and light green. Oz. 30c; ¼ lb. 80c; lb. \$2.50.

YANKEE HYBRID

50-54 days

ALL-AMERICA SELECTION Bronze Medal 1941

A very productive hybrid developed by the Connecticut Agricultural Experiment Station. It is the result of a cross between Connecticut Straightneck and Early Prolific Straightneck. It produces twice the quantity of early fruit compared with yields from either of its parents. We recommend it especially to market gardeners who grow squash for the early market. Oz. 60c; ¼ lb. \$2.00; lb. \$6.75.

BLACK ZUCCHINI

60-64 days

On the order of Cocosella Vegetable Marrow, but dark, greenish black color all over. The fruits 10-12 inches long by 3-3½ inches in diameter, cylindrical, with square ends. Oz. 25c; ¼ lb. 70c; lb. \$2.00.

WINTER SQUASH

BLUE HUBBARD

110-120 days

This is the true strain of the old favorite variety and is distinguished from the ordinary by its uniformity of shape, which includes prominent rounded "necks" at both ends, giving the fruit an elongated shape. Oz. 50c; ¼ lb. \$1.50; lb. \$5.00.

WARTED HUBBARD

110-120 days

This variety is typical Hubbard shape, with very dark green and heavily warted skin. This is one of the main storage types and our stock is unsurpassed. Oz. 30c; ¼ lb. 80c; lb. \$2.50.

IMPROVED HUBBARD (Green)

104-115 days

The old standard Hubbard squash which has never lost its popularity. The flesh is deep yellow, skin dark ivy green frequently striped at tip, rough and slightly warted. Oz. 30c; ¼ lb. 80c; lb. \$2.50.

GOLDEN HUBBARD (Red Hubbard) 98-103 days

This variety is similar to Improved in shape, but the fruits are smaller than Improved Hubbard, weighing from 8 to 10 pounds. The hard skin is covered with large shallow warts, and is reddish orange colored with grayish stripes at the blossom end. Oz. 25c; ¼ lb. 70c; lb. \$2.00.

WARREN TURBAN

115-125 days

A selected stock of the popular New England variety, turban shaped, flattened at top and bottom with a distinct button at the blossom end. The color is bright reddish orange with scattered grayish striping at blossom end. The shell is very hard, thick and heavily warted. Oz. 35c; ¼ lb. \$1.00; lb. \$3.00.

TABLE QUEEN (Acorn)

90-100 days

This variety, also called Des Moines Market, is a small, acorn-shaped squash, smooth and very dark greenish black in color with deep ridges. The flesh is thin, pale orange to deep yellow, and when baked (usually whole) and eaten from the shell is delicious. An excellent variety for home and market gardens or roadside stands. Oz. 25c; ¼ lb. 70c; lb. \$2.00.

*Butternut*

SQUASH — Continued

LARGE TABLE QUEEN

90–100 days

A larger version of Table Queen, also called Royal Acorn, a couple of inches longer and an inch thicker than its smaller cousin. Same dull, dark green shell, turning dull orange in storage, same excellent quality. Oz. 25c; ¼ lb. 70c; lb. \$2.00.

BOSTON MARROW

97–100 days

A popular shipping variety shaped like the Hubbard squashes, but with dull orange skin. The flesh is thick, orange tinged golden, fine grained and sweet. Oz. 20c; ¼ lb. 40c; lb. \$1.00.

BUTTERNUT

Maturing an abundant crop in late summer and early fall, this very meaty squash has quickly found favor. Fruits are 10–12 inches in length and 4–5 inches at largest diameter. The photograph clearly shows that it is nearly 100% meat. The flesh is dry and yellow, and it keeps well, making excellent pies. Also fine baked or boiled. Oz. 70c; ¼ lb. \$2.50; lb. \$8.00.

BUTTERCUP

100 days

Productive turban-shaped winter squash, 6–8 inches in diameter, dark green skin faintly striped with gray. Deep yellow, fine-grained, dry flesh of best quality. Keeps well. Oz. 45c; ¼ lb. \$1.20; lb. \$4.00.

DELICIOUS (Green)

100–105 days

Another standard variety similar to Golden Delicious, but it has a dark green skin with thin, light green stripe at the blossom end. The flesh is the same as Golden Delicious, but the color is not as intense an orange. Oz. 25c; ¼ lb. 55c; lb. \$1.50.

TOMATO

EARLIANA

60–69 days

A selection of this variety which is larger than the old type of Earliana, has a thicker skin and ripens well up to the stem end. This improved stock is very productive and has fewer cracks. ½ oz. 55c; oz. 90c; ¼ lb. \$3.00; lb. \$10.00.

VALIANT

60–70 days

Coming between Earliana types and Marglobe and Rutgers, Valiant will yield a fine crop averaging 7 oz. per fruit where it can mature most of its crop before severe heat comes in July. It has done wonderfully well in New Jersey. Smooth, heavy, solid and of fine quality. Owing to its sparse vine growth, it is subject to sunburn in sections where early maturity is not possible. ½ oz. 55c; oz. 70c; ¼ lb. \$2.50; lb. \$8.00.

PRITCHARD (Certified)

67–76 days

 Gold Medal 1933

Pritchard was developed by the U. S. Department of Agriculture by crossing Marglobe with Cooper's Special Self Topper. It combines the good qualities of both these varieties. The vines are distinctly bushy because of self-pruning or self-topping character. Fruits are large, smooth, globe-shaped and ripen uniformly to a very deep attractive red color both inside and out. ½ oz. 50c; oz. 70c; ¼ lb. \$2.50; lb. \$8.00.

SOUTHLAND

70–80 days

A new variety in Rutgers season, bearing fruit about the same size as Rutgers. Highly resistant to collar rot and fusarium wilt, considerably resistant to late blight, and moderately resistant to early blight. Good for canning, shipping and home gardens, it is a hardy, dependable, utility type. Oz. 90c; ¼ lb. \$3.00; lb. \$10.00.

LAKELAND

65–75 days

Fruits have a globe or slightly flattened globe shape, the first ones averaging about 6 oz. and later ones 4–5 oz. It is slightly more resistant to fusarium wilt and mosaic than Rutgers. Sets well in either wet or dry growing season and is a very heavy producer. Oz. 90c; ¼ lb. \$3.00; lb. \$10.00.

Rutgers

BOUNTY

60–70 days

An early variety developed by the North Dakota Agricultural Experiment Station. The fruits are scarlet in color, smooth, globular in shape and ripen uniformly with no dark green color around the stem. The vines are very small, fair foliage, although poor coverage because of prolific set. A very productive variety. ½ oz. 50c; oz. 70c; ¼ lb. \$2.50; lb. \$8.00.

STOKESDALE (Certified)

66–75 days

This variety is quite similar to Grothen's Globe in time of maturity and vine growth, except that the leaves are somewhat larger and heavier. The vines hold up better than Grothen's but the fruit is smaller in size than either Grothen's Globe or Rutgers. The fruit is bright scarlet in color and almost globe shaped. ½ oz. 50c; oz. 70c; ¼ lb. \$2.50; lb. \$8.00.

SCARLET DAWN

63–73 days

 Gold Medal 1935

An excellent bright scarlet sort which seldom shows any cracking and ripens evenly from blossom to stem end. The vines are medium sized, with spreading branches, giving fair coverage. ½ oz. 50c; oz. 70c; ¼ lb. \$2.50; lb. \$8.00.

GEM 60-65 days
A new variety of small and compact growth, adapted to northern climates. Plants may be set 3 by 4 or 2 by 5 feet. The fruits are medium deep, ripen uniformly and are medium to large in size. Being an early variety, it should be heavily fertilized or planted on rich ground with good moisture retaining ability. ½ oz. 55c; oz. 90c; ¼ lb. \$3.00; lb. \$10.00.

RED JACKET 65-68 days
A new New York State introduction, second early, with dense protective foliage, plant having a medium spread of 3½ to 5 ft. The fruits are large, slightly flattened, with solid interior. Adapted to northern New York and Canada. ½ oz. 55c; oz. 90c; ¼ lb. \$3.00; lb. \$10.00.

LONGRED 67-70 days
A new main crop variety developed by the New York State Experiment Station. The plant spreads 4 to 5½ ft. Fruits are globular in shape, with thick walls and solid interior. Adapted to northern New York and Canada. ½ oz. 55c; oz. 90c; ¼ lb. \$3.00; lb. \$10.00.

SIoux 70 days
Grows a large plant of good vigor. The fruits are medium in size, slightly flattened globe shape, and even ripening. They crack less than most varieties and have small stem and blossom scars. Fine for canning or market, with good color and walls. ½ oz. 55c; oz. 90c; ¼ lb. \$3.00; lb. \$10.00.

Gem Tomato

✓ **RUTGERS (Certified)** 73-83 days
This outstanding variety was developed by the New Jersey Agricultural Experiment Station. It is only a few days later than Marglobe, however, much more productive. The vines are heavy, vigorous, bushy growth, coarser foliage than Marglobe, medium dark green in color. Too much fertilizer may produce excessive foliage and late fruiting. The fruits are medium to large, shaped somewhat like Marglobe but flatter at the stem end. The color is deep or dark scarlet with a very large pulpy core of almost the same intense color as the outer surface of the fruit. ½ oz. 40c; oz. 60c; ¼ lb. \$1.95; lb. \$6.50.

MARGLOBE (Certified) 70-80 days
Introduced by the U. S. Department of Agriculture, but our strain has been bred to obtain nearly 100 per cent of perfectly shaped fruits, slightly deeper from stem to blossom end than it is thick from side to side. This means small loss from blossom end scar and from "flats." The fruit is deep scarlet in color, unusually heavy and firm. The interior has exceptionally small seed cavities. It is resistant to Fusarium wilt and nailhead rust. ½ oz. 35c; oz. 55c; ¼ lb. \$1.80; lb. \$6.00.

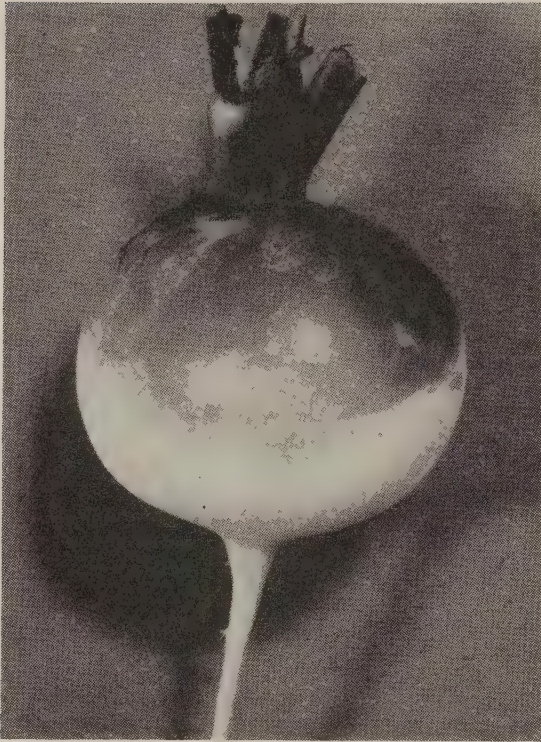

FIRESTEEL 60-70 days
A very large fruited tomato, globe shaped and dark crimson in color. Matures in about 70 days from transplanting, and is almost unaffected by heat and drought, outyielding standard sorts tremendously under such conditions. Smooth, solid fruits, of high quality. ½ oz. 35c; oz. 55c; ¼ lb. \$1.80; lb. \$6.00.

BONNY BEST 64-67 days
This early variety is very popular for home and market gardens. The fruit is bright scarlet in color, of fine quality, maturing all of the crop before the vines are killed by frost. The tomatoes are of good size, only slightly smaller than John Baer and the color extends right up to the stem without any green tinge. ½ oz. 35c; oz. 55c; ¼ lb. \$1.80; lb. \$6.00.

Pickling Varieties

	½ oz.	Oz.	¼ lb.	Lb.

TURNIP

Red Top White Globe

RED TOP WHITE GLOBE (Reselected) 58-63 days

This Special Strain is grown by us in Connecticut, and owing to the great amount of care and labor involved in making this the best strain on the market, we naturally have to ask a higher price for it than for the regular stock. However, many of our customers feel that the higher price they obtain for these extra fine turnips more than offsets the small increase in cost. Its particular feature is the purplish tinged red top which goes well down on the root. It is a quick growing type with finely flavored white flesh. It keeps well for such an early variety. $\frac{1}{4}$ lb. 70c; lb. \$2.00.

PURPLE TOP WHITE GLOBE

58-63 days

The most popular turnip for market or the home garden. It is globe shaped with purple skin around the top and white at the bottom, giving it a most attractive appearance. The flesh is pure white, fine grained and sweet. $\frac{1}{4}$ lb. 40c; lb. \$1.00.

WHITE EGG

52-57 days

A splendid early egg-shaped variety with white skin. It is one of the earliest turnips and grows half out of the ground. The flesh is fine grained and has a good flavor. $\frac{1}{4}$ lb. 50c; lb. \$1.25.

EARLY PURPLE TOP STRAP LEAF

45-48 days

This flat variety, with white skin and purple around the top, was formerly considered the best turnip of this type, until the introduction of Purple Top White Globe, which has practically supplanted it. $\frac{1}{4}$ lb. 50c; lb. \$1.25.

YELLOW GLOBE (Amber Globe)

73-76 days

A fine large, globe-shaped variety, yellow in color with a bronze-green top. The flesh is creamy yellow and of good quality. It is suitable for table use when young and is also used for stock feeding. $\frac{1}{4}$ lb. 50c; lb. \$1.40.

YELLOW ABERDEEN PURPLE TOP

75-80 days

The roots are $4\frac{1}{2}$ to 5 inches in diameter, globular, yellow with purplish red shoulders. The flesh is medium yellow and firm. Good storage variety, grown for stock and for winter table. $\frac{1}{4}$ lb. 50c; lb. \$1.40.

FOLIAGE TURNIP

SHOGGIN

35-40 days

This semi-globe shaped turnip with white skin and light green upright foliage is just as popular for greens as for roots. The flesh is pure white, crisp and sweet. It is highly resistant to both insects and blight, and grows well in the hottest and dryest weather. $\frac{1}{4}$ lb. 50c; lb. \$1.50.

SEVEN TOP (Winter Greens)

This variety is grown only for greens and is very popular in the South. $\frac{1}{4}$ lb. 25c; lb. 65c.

RUTABAGA

LONG ISLAND IMPROVED

85-90 days

This variety grown by us in Connecticut for many years is an excellent strain of the well known Long Island variety. The globe shaped roots are deep buff in color with purple top. Our strain is noted for its very short neck, fine grain, smoothness and sweet flavor. Our customers tell us that our stock is far superior to that sold by most other houses. The rutabagas grown from this seed always bring the highest prices on the New York produce market. It is also a splendid keeper. $\frac{1}{4}$ lb. 65c; lb. \$2.00.

SWEET GERMAN (Macomber)

82-92 days

This variety is used for the table, winter storage and for stock feeding. The roots are large, short, thick top shape, white with bronzed green shoulder, medium neck. The flesh is creamy white, sweet and solid. $\frac{1}{4}$ lb. 50c; lb. \$1.60.

AMERICAN PURPLE TOP

85-90 days

Our regular strain of this popular variety. The roots are globe shaped with small neck, buff in color and purple around the top. We recommend our Special Strain, Long Island Improved as far superior. $\frac{1}{4}$ lb. 50c; lb. \$1.60.

BROCCOLI RAAB

FALL

A winter annual, making heavy compact top growth early in spring for greens. The leaves are broad strap-leaf turnip type. It grows 18 to 22 inches tall, before going to seed. $\frac{1}{4}$ lb. 50c; lb. \$1.50.

SPRING

This variety is the same as Fall Broccoli Raab, but must be planted in the spring, as it will not winter over. This is an annual and it shoots to seed rapidly. It is also used for early market greens. $\frac{1}{4}$ lb. 50c; lb. \$1.50.

WATERMELON

DIXIE QUEEN

82-85 days

A medium-sized, oval shaped melon with light and dark stripes that is popular on account of its delicious sweetness. The rind is thin but tough and the flesh bright red. One of the best shipping varieties used in the South. It is not too large, but sometimes reaching 50 pounds in weight. Oz. 30c; ¼ lb. 80c; lb. \$2.50.

Dixie Queen

TOM WATSON

90-95 days

This is the most popular of all shipping melons. A decided improvement over the ordinary strain of Tom Watson, with a darker rind and flesh of deeper red. In shape it is long, dark green, showing a distinctly fine vein under its general color. The luscious crimson flesh is very sweet and of the best flavor. Oz. 25c; ¼ lb. 55c; lb. \$1.50.

STONE MOUNTAIN

90-95 days

This is an early melon that has become very popular in all the large Watermelon growing districts. It is a large, round melon with deep red flesh that has a delicious flavor. The medium hard, green rind makes it an excellent shipping variety. Oz. 25c; ¼ lb. 55c; lb. \$1.50.

PEERLESS (Ice Cream)

85-90 days

A home garden type melon, medium size, oval, thin brittle rind, bright green with fine dark green veining. The flesh is bright scarlet and of very good quality. Oz. 25c; ¼ lb. 55c; lb. \$1.50.

BLACKLEE (New Wilt-Resistant)

90-95 days

This wilt resistant variety is a vigorous, attractive melon of medium size (34 lbs.), with a thin, tough, dark rich green colored rind which makes it a good long distance shipper and a good keeper. The fruit is smooth, elongated, blocky, and symmetrical. Oz. 40c; ¼ lb. \$1.25; lb. \$4.00.

DARLINGTON

85-90 days

An improved Garrison type. A large melon, striped dark green and ivory with fine veinings of green. This white seeded type has no equal for local markets. Oz. 40c; ¼ lb. \$1.25; lb. \$4.00.

WONDER (Improved Kleckley's Sweet)

80-85 days

The sweetest, finest flavored melon grown; it is a long oval with a dark glossy green rind. The flesh is bright red, fine grained and deliciously sweet. The melons weigh 30 to 35 lbs. Oz. 25c; ¼ lb. 55c; lb. \$1.50.

LEESBURG (Wilt-Resistant)

85-90 days

A wilt-resistant strain of Kleckley's Sweet developed at the University of Florida Experiment Station. It is a long dark green melon, very uniform and an excellent tough-skinned shipping variety. Oz. 25c; ¼ lb. 65c; lb. \$1.75.

CITRON, GREEN SEEDED

90-95 days

The fruits are small and round; flesh white, used for preserving. Oz. 25c; ¼ lb. 55c; lb. \$1.50.

CITRON, RED SEEDED

90-95 days

A small round variety with red seed also used for preserving. Oz. 25c; ¼ lb. 55c; lb. \$1.50.

HERBS

	oz.	¼ lb.	Lb.

FIELD CORN

Hybrid Field Corns

CORNELL 29-3

Adapted for silage at medium and high elevations and for grain at low and medium elevations. Medium to tall in height, ears medium sized, 12-16 rowed and variable in kernel color — red, yellow, white-capped yellow, dent and semi-flint. Has a fine root system, does not lodge, and is a heavy producer of silage. 14 lbs. \$2.50; 56 lbs. \$8.00.

CORNELL 35-5

Similar in purpose to Cornell 34-53, but slightly later. Medium in height, ears medium sized, moderately uniform, kernels dent, medium small, in 14-18 rows, and uniformly yellow. Produces grain in areas where season is too short for Cornell 29-3. 14 lbs. \$2.50; 56 lbs. \$8.00.

HYBRID YELLOW SWEEP-STAKES

Heavy yielder, highly wind-resistant, does fine in New York and New England.

14 lbs.	56 lbs.
\$4.00	\$12.00

HYBRID RED SWEEPSTAKES

Has done exceptionally well in New England and New York. Big tonnage for silo; tall, sturdy stalks. Usually has 2 large ears per stalk. For grain or silage..

4.00	12.00
------	-------

Dent Corns

14 lbs. 56 lbs.

EUREKA

Extremely tall ensilage corn for silage; does not mature ears in the North.

\$2.00	\$6.00
--------	--------

LANCASTER SURE CROP

Red cobbed, yellow dent, quite early, stalks 8-12 feet tall.

2.00	6.00
------	------

LEAMING

Early yellow dent, ears about 10 inches long, good for silo..

2.00	6.00
------	------

WESTBRANCH SWEEP-STAKES

Fine ensilage corn, ears 11-12 inches, stalks 10-12 feet. Kernels mostly reddish. Early..

2.50	7.00
------	------

YELLOW SWEEPSTAKES

Largest yellow kernels, ears 12 inches long. Earlier than Eureka. Good for ensilage.

2.50	7.00
------	------

SWEET FODDER

Tall growing sweet corns for fodder. 12½ lbs.,

1.75	50 lbs., 5.00
------	---------------

Flint Corns

LONGFELLOW

Long eared, 8 rows. For husking or silo in the North. . .

2.50	7.50
------	------

Field Seeds

WE ENDEAVOR TO CARRY A FULL LINE OF FIELD SEEDS — CLOVERS, ALFALFA, TIMOTHY, ETC.

As their values are constantly changing, we suggest that you ask us for prices when you are in the market. See inside back cover.

BUNCHING TWINE

Twine is used on farms for a number of purposes, the main one being the bunching of vegetables. It may also be used for tying up vines, and in many other ways. It comes wound on a spool or reel, like barbed wire, but is in the form of a loose rope of 100 strands. In this way it is possible to cut 50 or 100 strings the same length at one time. Orders will be accepted for full reels only, the average weight being 50 pounds per reel. Samples will be sent free on request.

No. 24	2-Ply	.41 lb.
No. 24	3-Ply	.41 lb.
No. 24	4-Ply	.41 lb.

HERE ARE SOME WINNERS FOR '49

CASERTA SQUASH ALL-AMERICA SELECTION **GOLD MEDAL 1949**

Developed by Dr. L. C. Curtis. An early Cocolle-type summer squash which produces a very heavy yield of attractive fruits. This variety won the first Gold Medal Award given to a vegetable variety since 1935. See page 26.

LAKELAND TOMATO

A splendid new, heavy yielding variety, maturing about 5 days earlier than Marglobe and 12 days earlier than Rutgers. This tomato has an exceptional depth of fruit which makes it an excellent slicer. It is free from radial cracking and essentially free from circumferential cracks. See page 28.

ILLINOIS F5 PEPPER

This is of the Ruby King type, 3- and 4-lobed, with fruit length of 4½–5 inches and diameter at the stem end of 3½–4 inches. Normally, 45 fruits will fill a bushel, and it yields consistently throughout the season. See page 22.

GOLDEN SECURITY HYBRID CORN

This is one of our introductions, and is the heaviest yielding hybrid sweet corn we have seen, with a very large percentage of 2-eared stalks. It matures in season with Golden Cross Bantam, is resistant to fusarium wilt and smut. The ears are 8–8½ inches long, and the 7½ foot stalk has an excellent root system. See page 11.

PROGRESS LETTUCE

This is a new introduction developed by the U.S.D.A. It is an early, dark green, crisp heading variety of exceptionally fine flavor and quality. Our supply for 1949 is very limited. See page 16.

PENNLAKE LETTUCE

LARGE YELLOW SWEET PEPPER

PREMIER GREAT LAKES LETTUCE

VICTORY GOLDEN SWEET CORN HYBRID

Spergon

REG. U. S. PAT. OFF.

A new fungicide for treating seeds, with resulting increases in stand and yield. Suitable for any kind of seeds, it is **SAFE** for delicate seeds and safer for the operator, **PROTECTS** against "damping off" and seed decay, **STIMULATES** growth, healthy plants and higher yields. It may be used with inoculants, and peas treated with it require no graphite. It retains its strength, coats evenly, adheres well. Contains no mercury or copper.

5 gallon can.....	61.50

(Larger sizes available)

Gallon and larger, F. O. B. Connecticut

ARASAN—Seed Treatment

For corn, beans, peas and vegetable seeds. Usually reduces loss from seed decay and damping off. Use 2 to 8 oz. per 100 lbs. of seed, depending on the kind. 3/4 oz. pkg. 25c; 8 oz. can 80c; 4 lb. can \$5.25 (postpaid).

SEMESAN JR.—For Seed Corn

Helps protect seed against rotting in cold, wet soils; controls damping off or seedling blight and root-rot caused by certain molds (fungi) on field, sweet and popcorn. Often improves germination, stands and yields. Use 1 1/2 oz. per bushel. 1 1/2 oz. pkg. 20c; 12 oz. can 70c (postpaid).

SEMESAN BEL—For Seed Potatoes

To reduce seed decay and certain diseases of Irish or Sweet Potatoes. Use 1 oz. to 5 bushels. 2 oz. pkg. 35c; 1 lb. can \$1.90; 4 lb. can \$6.50 (postpaid); 40 lb. drum \$59.00 (express collect).

CROW REPELLENT

This is the genuine Stanley's Crow Repellent which we have handled for years.

As a protection against the loss of corn, this has no equal. Crows simply will not touch corn that has been treated with this Crow Repellent. It has the advantage of not clogging a corn planter, nor is it necessary to dry the corn after treatment.

At a cost of 15c to 20c per acre you can protect your corn against crows, pheasants, squirrels, and other pests.

QUART CAN, enough to treat 4 bushels, \$1.75.

PINT CAN, enough for 2 bushels, \$1.00.

HALF PINT, enough for 1 bushel, 60c.

Be sure to mention

Kind of Seed to be Treated

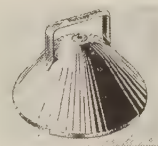

Seed Treatment Pays

You can have larger yields and better crops if you will use the modern, proven seed treatments listed in this catalog.

Germaco Hotkaps

Mature your crops 2 to 3 weeks earlier. Get premium prices and bigger yields by protecting your young plants with Hotkaps, patented wax paper cones — miniature hothouses that keep out frost, rain, wind, birds and insects. They maintain a perfect mulch around each plant, promoting sturdy growth. Save work and worry. Millions of Hotkaps are used every season. Inexpensive to buy. One man can set out 2,000 or more in a day.

Steel Setter

1,000 for \$14.65; 5,000 @ \$14.50 per M; 10,000 @ \$14.35 per M; 25,000 @ \$14.20 per M. Steel setter, \$1.95. F.O.B. Milford, Conn.

'TWIST-EMS'

'Twist-Ems' are strong, dark green, paper covered wires, which you use to tie up vegetables to stakes or for bunching. Won't rot like string and are easier and more quick to fasten.

Utility 'Twist-Ems'

**FOR MARKET GARDENERS
AND GREENHOUSE GROWERS**

Available this year in 8" length, these are packed in bundles of 250 pieces ready to use. The supply is limited because of paper and wire shortages.

HAY AND PASTURE MIXTURES

We can supply the following Cornell Mixtures which have been suggested by the New York State College of Agriculture.

Cornell Permanent Pasture Mixture (1949 formula)
 Cornell General Purpose Mixture (1949 formula)
 Cornell Utility Mixture (1949 formula)
 Cornell Ladino Mixture (1949 formula)

We can also offer our own formulas which have been proven to be excellent for fine pasture.

Woodco Pasture Mixture
 Woodco Pasture Mixture for Dry land

IMPORTANT: Grass, field and legume seed prices vary constantly. Write, wire or phone us for prices, mentioning the quality and quantity in which you are interested. We will be happy to quote you immediately.
